ADMINISTRATIVE LAW, LEGISLATION, AND GOVERNANCE

Administrative Law, Legislation, and Governance and Its Application to Legal Practice

The focus of this cluster is lawmaking by Congress (statutes) and administrative agencies (regulations and rules). The reach of the modern administrative state is vast and involves areas such as financial regulation, health and safety regulation, the administration of disability and welfare programs, discrimination law, workplace regulation, food and drug law, and immigration policy, to name just a few. Correspondingly, the range of courses that fall within this cluster is extensive and signals the pervasive importance of administrative law to legal practice today.

Understanding the functions of lawmakers and rule-making entities in all levels of government is critical to a number of legal practices. Many lawyers work within administrative agencies and on the Hill, playing a key role in drafting and implementing statutes and defending agency decisions in court. Some attorneys work as litigators, representing their clients or public interest causes before administrative agencies and other rule-making bodies. Private sector regulatory and transactional attorneys are tasked with interpreting and providing counsel with respect to agency rules as they apply to their clients’ particular facts or case and must draw from their understanding of the government processes central to the enactment of these laws and regulations. Students interested in the area of government regulation not only need to cultivate a basic understanding of how agencies regulate and how lawyers can most effectively interact with agencies (by taking introductory offerings like Administrative Law), but also need to consider how they will apply these concepts in their career with respect to particular agencies and statutes (by taking courses in their desired subject-matter area, such as public health law, securities regulation, environmental policy, etc.). Proficient administrative law practitioners acquire the skill to use and adapt procedural rules in ways that advance the policy objectives that are present in particular substantive areas of the law.

Introductory and First-Year Offerings

In this field, the basic introductory courses are Administrative Law and Lawmaking or Legislation. These courses provide a gateway for many other offerings.

Administrative Law studies the delegation of power to agencies, the procedures followed by agencies, and judicial and other oversight of agencies. The power of agencies to promulgate rules, decide individual cases, and conduct investigations is carefully studied. While the focus in Administrative Law is on federal programs and cases, the principles developed in the federal domain dominate state and local regulatory and administrative law as well, although of course their application sometimes differs. In short, whether or not one expects to practice in areas that involve federal programs, Administrative Law is often a basic framework course. The upperclass curriculum offers Administrative Law each semester, including at least one section a year that gives priority to our evening students. Lawmaking (or the course by the title, Legislation) is a course about how laws are created and the relationships among legislators, courts, and agencies. A critical component of the course is teaching students the basic skills of statutory interpretation.

While only a few upperclass electives formally require that students first complete the basic course in Administrative Law, it is generally a good idea to take Administrative Law sooner rather than later when one is studying government regulation. Similarly, Lawmaking is not a stated prerequisite for any upperclass electives, but its focus on teaching the skill of statutory interpretation is applicable to all statute-based legal fields.

The Law Center offers its first-year students the opportunity to be exposed to this area as part of their first-year curriculum.

- First-year day students in Curriculum A have the opportunity to choose their first-year elective in this area of study, offering courses such as Administrative Law, Congress and the Administrative State, Lawmaking, and The Regulatory State.
- First-year students in Curriculum B take Government Processes, which looks closely at the regulatory state and its institutional actors.
- Part-time students have a choice of upperclass courses in this area that will meet their "first-year" elective requirement, including Administrative Law and Lawmaking which are offered once a year in the evening.

Connections to Other Curricular Areas

The area of government regulation is so vast that several other curriculum clusters are closely related to it in the sense that Administrative Law and Lawmaking are sensible introductory courses for students interested in those fields. Examples include the Antitrust Law, Commercial and Advanced Contract Law, Communications Law, Corporate Law and Securities Regulation, Education Law and Policy, Environmental Law, and Taxation clusters. In addition we offer a number of courses and seminars in specific areas exploring government regulation of a single activity. Below we highlight some of these courses in order to illustrate the range this field offers. On the Courses tab, we provide a more comprehensive list of the courses offered in this area in the current and past two years. In each case, the goal is to unite the general principles of administrative law, legislation, and governance with the particular attributes of the subject matter at hand.

- Aviation Law encompasses air transportation, including liability and economic regulation issues.
- Of great interest in Washington, D.C. is the regulation of elections and campaign financing. The Election Law course and practicum focus on these issues.
- The regulation of banking and financial institutions has been an important area of government regulation in recent years.
  - Federal Banking Regulation: Modern Financial Institutions and Change focuses on federal regulation of banks, bank holding companies, and their affiliates, and examines the global financial crisis of 2008, the fractured financial regulatory system, and the proposals for reform.
  - Federal Regulation of Financial Institutions covers the federal deposit insurance system, bank failures, restrictions on bank activities in investment banking and mutual funds, and current issues surrounding geographic expansion.
- The graduate program offers a host of advanced courses on regulation of the financial industry, including Derivatives Market
Regulation Under Dodd-Frank and SEC Regulation of Financial Institutions and the Securities Markets.

- Food and drug and health law are rapidly growing areas covered in several courses and seminars. The Food and Drug Law survey course and the fieldwork practicum Public Interest Advocacy: Government Regulation of Food and Personal Care Products focus on the activities of the Food and Drug Administration. There are also courses and seminars on health law and policy, public health law, and the regulation of medical technology.

- Immigration Law and Policy explores immigration regulation and lawmaking, with attention paid to the multi-branch process of establishing, implementing, and reviewing immigration law.

- The course in Local Government Law studies how local governments act, often through administrative agencies such as the school board or the zoning board, thereby bringing fundamental issues of administrative law into play.

- The Space Law Seminar explores similar topics in the context of scientific and commercial uses of outer space.

Opportunities to Experience Administrative Law in Washington, D.C.

One of Georgetown Law’s greatest assets is its physical proximity to all three branches of government. Through practicum and clinical offerings and externship placements, students can observe and participate in the creation, implementation, and interpretation of the law. The following experiential opportunities are examples of the countless ways to gain this first-hand view of Administrative Law through our experiential offerings:

- Civ Tech: Digital Tools and Access to Justice Practicum integrates classroom learning on how regulatory agencies work with hands-on collaboration with these agencies. As part of the experiential component, students develop apps that increase access to justice and/or improves the effectiveness of legal representation.

- In the Public Interest Advocacy: Government Regulation of Food and Personal-Care Products practicum, students utilize legislative and administrative materials as well as case law to become acquainted with the processes by which the federal government regulates food and personal-care products, and to critique both the statutory framework and the performance of FDA in carrying out its administrative duties. In their fieldwork, students are assigned to projects at the Environmental Working Group.

- Policy Clinic (Harrison Institute for Public Law) is a fall-semester or year-long opportunity for students to serve legislators, attorneys general, regulatory agencies, citizen coalitions and Georgetown programs that support government needs. As their policy lawyers, clinic students analyze lawmaking authority, identify options for changing policy, help clients plan their strategy, and draft policy based on client choices. Students work in one or more project teams: (1) health and food policy (e.g., regulation and purchasing of school food, legal issues in health reform); (2) human rights and worker strategies (e.g., human rights and labor standards in government purchasing, employment policies of universities); (3) trade policy (e.g., regulation of services, foreign investor rights, subsidies, procurement); and (4) climate policy (e.g., adapting to sea level rise, drought, and urban heat effects through land use regulation, transportation planning, and funding of infrastructure).

- In the Federal Legislation Clinic, students are prepared to work as "legislative lawyers." In addition to classroom instruction on the organization and operation of the federal legislative and executive branches, students participate in intensive field work involving legislative research, preparation of written advocacy materials, and participation in hearings and other legislative encounters.

- Students have participated as externs for academic credit at a number of agencies and non-governmental organizations (NGO) working in the area of administrative law. Some externs participate in litigation before courts and agencies, help develop comments on agency rulemakings—or, if placed with an agency working on a rulemaking, receive, review, and analyze comments submitted in response to a proposed rule—and conduct research that informs strategic litigation and counseling decisions. Past externs have also contributed to agency and NGO efforts to shape legislation. As discussed above, students interested in a practice involving government regulation and administrative law should also choose a specific subject matter. To take one example, some of our past students interested in the regulation of the environment found externship placements at the White House Council on Environmental Quality (CEQ), the Environmental Protection Agency (EPA) in both the Office of Criminal Enforcement and Office of Administrative Law Judges, as well non-profit organizations such as Ocean and the Natural Resource Defense Council. Students placed at CEQ helped staff advise agencies and the Executive Office of the President on how to apply environmental impact review requirements and also to develop and shepherd initiatives requiring coordination among multiethnic agencies.

Search Administrative Law, Legislation, and Governance Courses (http://curriculum.law.georgetown.edu/course-search?keyword=LAW%20025%20v00)

LAW 025 v00 Administrative Law (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20025%20v00)

J.D. Course (cross-listed) | 3 credit hours
This course considers the constitutional, statutory, and other legal limitations on what government agencies can do and how they can do it. What constraints govern the power of agencies to make law, decide cases involving private parties, and investigate citizens? How much “due process” must government agencies give citizens whose lives they affect; what limits has Congress imposed on the procedures for agency decision making; and to what extent can people call on courts to check what they regard as abuses of governmental power? These are among the questions addressed in the course, which draws together problems ranging from the legitimacy of New Deal institutions to the dramatic procedural innovations of recent federal administrations and problems created by renewed Congressional interest in the details of agency decision making.

Recommended: For Professor Nager’s section: Prior or concurrent enrollment in Constitutional Law I: The Federal System.

Mutually Excluded Courses: Students may not receive credit for both this course and the first-year elective by the same name or the first-year course, Government Processes.
This course is designed to introduce you to the core institutions and processes of the modern administrative state. You will come to understand the tremendous power exercised by administrative agencies as well as the significant constraints under which they operate. You will learn the procedures governing the key categories of administrative action; the doctrine governing judicial review of administrative action; and non-judicial mechanisms of agency control within the Constitution’s separation-of-powers framework.

**Learning Goals:** By the end of the semester, you should be able to:

1. Identify the legal framework (statutory, constitutional, doctrinal) that applies to a particular issue of administrative action;
2. Apply the relevant legal framework to a given set of facts; and
3. Evaluate the merits of the legal framework against a variety of normative goals.

You should also (4) be conversant in contemporary debates about the administrative state and be able to articulate and justify your views.

**Mutually Excluded Courses:** Students may not receive credit for this course and the upperclass course with the same title.

**Note:** This course is a first-year elective. First-year day students select an elective offered in the spring.

LAW 1349 v00 Administrative Law
J.D. Course | 3 credit hours
This course introduces you to the modern administrative and regulatory state. You will come to understand both the tremendous power exercised by administrative agencies and the significant constraints (legal and political) under which they operate. You will learn to identify the design features that might make an agency constitutionally problematic, the factors that make one type of decision-making framework more appropriate than another, the prerogatives and limits of agencies in interpreting the statutes they are charged with administering, and agencies' prerogatives and limits in adjudicating facts and exercising policymaking discretion. You will also learn to identify the factors that affect the availability and timing of judicial review of agency action.

**Mutually Excluded Courses:** Students may not receive credit for both this course and the upperclass course with the same title.

**Note:** This course is a first-year elective. First-year day students select an elective offered in the spring.
Administrative Law and Public Administration Seminar

J.D. Seminar | 2-3 credit hours
Administrative law scholars have observed an increasing disconnect between the legal framework and doctrine governing agencies, on the one hand, and the way that the administrative state actually operates, on the other. For example, administrative law tends to concern itself with external sources of control over agencies, while in fact most of the work of the administrative state takes place in day-to-day internal operations.

In this seminar, we use administrative law as a jumping off point to study a complementary set of frameworks and practices that govern and explain the operation of the administrative state: those drawn from public administration and political science. Lawyers who understand these complementary tools will be better prepared to advise clients on their interactions with institutions in the administrative state; to work within the institutions of the administrative state themselves; and to design and reform those institutions in the first instance.

This course is also a writing-intensive class that satisfies the Upperclass Legal Writing Requirement. To that end, each of you will devote a considerable amount of time this semester to developing a paper proposal about a conflict, crisis, or controversy within the operations of a government institution; researching your idea in depth; and both drafting and revising a substantial paper of at least six thousand words (exclusive of footnotes) that meets the different elements of the Writing Requirement. The last month of the semester will be devoted to workshopping these papers—that is, giving feedback to and receiving feedback from your colleagues.

Learning goals:

By the end of the course, students will be able to describe and discuss the core insights of the texts we will read; to assess the merits of these insights; and to apply these insights to everyday situations relevant to the institutions of government in D.C. and beyond. Students will also have written a paper of publishable quality analyzing and assessing a conflict, crisis, or controversy within the operations of a government institution using the lens of the tools we have studied.

Prerequisite: Administrative Law (1L elective or upper level course) or Legislation and Regulation.

Note: This seminar requires a paper. J.D. students must register for the 3 credit section of the seminar if they wish to write a paper fulfilling the Upperclass Legal Writing Requirement. The paper requirements of the 2 credit section will not fulfill the J.D. Upperclass Legal Writing Requirement.

Advanced Environmental Law: Climate Change

J.D. Practicum (cross-listed) | 4 credit hours
In a project-based practicum course, students participate in a weekly seminar and work on a project under the supervision of their professor. This project-based practicum course will focus on the evolving legal and policy developments concerning global climate change, and provide students the opportunity to engage in hands-on work with policymakers in addressing the issue. Students will participate in a two hour/week seminar and carry out ten hours/week of project work including regularly scheduled meetings with professor and Georgetown Climate Center attorney advisors.

SEMINAR: This seminar covers the current understanding of climate change science and impacts, international and domestic policy approaches, technological and adaptation responses, and legal and regulatory cases and developments. Class participation and attendance will be graded.

PROJECT WORK: Students will prepare papers and make presentations in class and to outside “clients” on topics being analyzed for state and local governments through the work of the Georgetown Climate Center of Georgetown Law (http://www.georgetownclimate.org). Students work with professor and advisors to develop professional-quality work products that can be shared with outside “clients.” The Center works with states and communities on crafting policy strategies to reduce emissions that contribute to climate change and to adapt to the consequences of climate change.

Prerequisite: Environmental Law. J.D. students must complete the required first-year program prior to enrolling in this course (part-time and interdivisional transfer students may enroll prior to completing Criminal Justice, Property, or their first-year elective).

Mutually Excluded Courses: Students may not take another practicum course or a clinic at the same time as a project-based practicum course.

Note: This course may be suitable for evening students who can regularly attend class and participate in calls or meetings during the day as students interact with professors, advisors, and/or clients.

This is a four credit course. Two credits will be awarded for the two-hour weekly seminar and two credits for approximately ten hours of project work per week, for a minimum of 11 weeks. Both the seminar portion and the project work will be graded. Students who enroll in this course will be automatically enrolled in both the seminar and project components and may not take either component separately. After Add/Drop, a student who wishes to withdraw from a practicum course must obtain permission from the faculty member and the Assistant Dean for Experiential Education. The Assistant Dean will grant such withdrawal requests only when remaining enrolled in the practicum would cause significant hardship for the student. A student who is granted permission to withdraw will be withdrawn from both the seminar and project components. Regular and punctual attendance is required at all practicum seminars and students are required to devote the requisite number of hours to their project. If a student must miss seminar, project work, a meeting or a deliverable, he or she must speak to the professor as soon as possible (ideally beforehand) to discuss the absence or missed assignment. Unless the professor indicates otherwise, a student with more than one unexcused absence from the practicum seminar (out of 13 total seminar sessions), or one week of unexcused absences from the fieldwork or project work (out of a total of 11 weeks of fieldwork or project work), may receive a lower grade or, at the professor’s discretion, may be withdrawn from the practicum course.
**LAW 1336 v00 Advanced Legal Practice: Writing in the Legislative Sphere**
(http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201336%20v00)

J.D. Seminar | 3 credit hours
In this class, we will examine the inner workings of Congress and think through strategies for achieving policy goals through legislation. You will draft legislative language in a policy area of your choice and attempt to convince a legislator to support the bill by writing a policy brief supporting the new statute. By acting in the role of a lawyer on the Hill, you learn not only how to solve complex legal problems in a legislative context, but also to think critically about the role of the legislative branch and of a lawyer within that branch.

The course will take you through the nuts and bolts of the process of lawmaking, from introduction, to the Committee process, to passage. You will also be asked to think broadly about the role of a lawyer in Congress, the connection (or lack thereof) between legislative history and statutory interpretation, and the relationship between the legislative branch and the other power centers of American government.

But the main focus of this course is on the writing you will do. You will pick both a topic and a legislator for whom you are a staffer. You will spend much of the semester researching the topic, drafting new statutory language to solve a problem in this area, and writing a policy brief to persuade the legislator to sponsor the bill. We will spend class time thinking through each stage of the writing process: from topic selection to research to legislative language to drafting. You will also have the opportunity to present your bill language and your arguments for sponsorship to a group of “legislators” (played by me and your classmates) who are considering sponsoring the bill.

**Recommended:** A basic course in Legislation or the 1L electives, Congressional Procedure & the Administrative State or Legislation and Regulation or The Regulatory State.

---

**LAW 065 v02 Alternative, Complementary, and Integrative Medicine, The Legal Issues Seminar**
(http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20065%20v02)

J.D. Seminar (cross-listed) | 3 credit hours
Alternative, Complementary, and Integrative Medicine (“non-traditional medicine”) (“CAM”) is the fastest-growing sector of American Health Care and is one of the fastest growing fields in the United States. Presently, at least 50 percent of Americans are using some form of alternative and complementary therapy such as acupuncture, nutritional supplement, herbs, massage, yoga, chiropractic or homeopathy. According to the Journal of the American Medical Association in 1997, visits to alternative health care practitioners exceeded total visits to all conventional primary care physicians. The number of clinics and hospitals that integrate some modalities of CAM alongside conventional medicine is growing rapidly. The Institute of Medicine, a part of the National Academy of Sciences, has held recent conferences on the values of both CAM and Integrative Medicine. The NIH is using significant resources to fund research in this area.

This development, of course, is raising legal issues. There is a growing but still unsettled body of law on this subject. Some but not all CAM modalities are now licensed and regulated by at least some states. Federal regulatory bodies, such as the FDA and FTC are trying, within the limits of their statutory authority, to protect what they perceive to be the interests of the public. Yet, they come at the problem through conventional, rather than alternative, eyes. Conventional law is based upon protecting the public from purveyors of the proverbial “snake oil” frauds. And to an extent this law is being used to keep out alternatives to the established health-care modalities. This seminar studies the tensions, legal, economic, and social, of this struggle as it unfolds. This seminar covers several areas of law including administrative law, medical malpractice, informed consent, FDA/FTC law, licensure, among others. This seminar discusses the balancing of paternalism vs. individual rights. A paper meeting the upperclass legal writing requirement is required.

---

**LAW 1604 v00 Affordable Housing Seminar**
(http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201604%20v00)

J.D. Seminar | 3 credit hours
The goal of this seminar is to expose you to the policy, law and practice concerning the provision and preservation of affordable housing and its relationship to personhood, to community, and to society as a whole. Specifically, we will examine the problems caused by the absence of a sufficient number of safe, sanitary, decent, and affordable units for households of low and moderate income. We will look at aspects of federal and local housing policy from both a current and an historical viewpoint. We will place particular emphasis on issues of poverty and race. Your paper can examine any element of affordable housing regardless of whether it is covered in class.
LAW 1107 v00 Analytical Methods (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW %201107%20v00)

J.D. Course (cross-listed) | 3 credit hours

Lawyers in every type of practice (corporate, litigation, government, public interest, etc.) routinely deal with problems that require a basic understanding of concepts and methods from economics and statistics. This course provides an introduction to these subjects and their application and relevance to law and legal practice. Topics covered include decision analysis, game theory, probability, and statistics. Grades will be based on a graded problem set and a take-home final examination. No prior background in economics or statistics is required; however, we will regularly use elementary algebra and geometry. Students with strong backgrounds in economics, mathematics, or statistics should consult with the professor before enrolling in the course.

Course Objective and Learning Outcomes: The objective of the course is to enhance students' ability to give sound legal advice and make effective legal arguments by introducing them to selected concepts and methods from economics and statistics that are relevant to numerous areas of law and legal practice. These concepts and methods include: decision trees, expected value, sensitivity analysis, risk aversion, present value; Nash equilibrium, game trees, backward induction, subgame perfection, moral hazard, adverse selection; probability, conditional probability, independence, Bayes' rule; descriptive statistics (including measures of central tendency and variability), hypothesis testing, confidence intervals, statistical significance, type I and type II errors, and regression analysis.

By the end of the course, I expect students to have a good understanding of these concepts and methods and to be able demonstrate a basic proficiency in applying them to: (i) unpack complex decisions of the kind that lawyers and their clients often encounter in litigation and transactions; (ii) analyze situations involving strategic interactions (i.e., situations where the outcome depends on the strategies and actions of multiple parties) of the kind that lawyers and their clients often encounter in litigation and transactions; and (iii) engage in probabilistic and statistical reasoning and evaluate probabilistic and statistical evidence of the kind that courts and lawyers often encounter in litigation.

LAW 050 v01 Aviation Law (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20050%20v01)

J.D. Course (cross-listed) | 2 credit hours

The course, taught by practitioners in the field, covers contemporary and cutting-edge aviation topics such as international commercial aviation, aviation security, and the integration of unmanned aircraft systems (i.e., drones) into the national airspace. The course material will encompass most aspects of aviation law, including the law of international civil aviation, the economic and safety regulation of air transportation, aircraft registration and certification, aircraft accidents, airport law, government immunity from tort liability, and airline liability for the carriage of passengers and cargo domestically and internationally under the Montreal Convention. Students are exposed to a range of materials, including cases, treaties, executive agreements, and regulations, with a view towards imparting practical skills that can be applied to any field of law.

LAW 611 v17 Big Data, Face Recognition and the Limits of the Legislature: A Bill Negotiation Simulation (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW %20611%20v17)

J.D. Seminar | 1 credit hour

If you have ever taken advantage of basic government services, your personal information is part of a massive trove of data that local, state and federal agencies share with one another through a variety of overlapping networks, databases and bureaucratic collaboratives. This infrastructure has been built over the course of the last 20 years, for the most part without any oversight or accountability, let alone transparency to the public.

Some policymakers—pushed by civil rights advocates and grassroots organizations—have begun to try to check the exponential growth in government power that these technologies have made possible. Last year, the Washington Post reported that Immigration and Customs Enforcement (ICE) was running face recognition searches on Maryland’s driver information databases. Community groups, including one group represented by Georgetown’s own Federal Legislation Clinic, demanded that legislators take action.

In this course, students will simulate the actual bill negotiation that took place last year in the Maryland State legislature. Using a fact pattern based on what unfolded, but fictionalized to protect client confidentiality, students will assume coalition roles to broker, draft, amend, and advocate for their own privacy bill from the perspective of those assigned roles.

Learning Objectives:

Through this course, students will have the opportunity to:

- Learn the legal, political and technological frameworks around government use of face recognition.
- Gain a basic understanding of the databases, networks and information sharing partnerships that pervade government bureaucracy.
- Practice legislative drafting and bill amendment.
- Create a bill pitch and deliver it for feedback to a panel of advocates and academics with first-hand knowledge of the Maryland bill.
- Devise and execute a political strategy to build an advocacy coalition and navigate their bill through the legislature.
- Draft hearing testimony and participate in a mock committee hearing.

Note: This course is mandatory pass/fail, and does NOT count against the 7-credit pass/fail limit for J.D. students.

This optional, elective course is for first-year J.D. students only, who will enroll via the Live Registration process. ATTENDANCE AT ALL CLASS SESSIONS IS MANDATORY. All enrolled and waitlisted students must be in attendance at the start of the first class session in order to be eligible for a seat in the class and must attend each class session in its entirety. For more information, please see the Week One website (https://www.law.georgetown.edu/experiential-learning/simulations/first-year-week-one-simulations). Due to the intensive nature of the course, the small-group, team, and individual work that is involved, and the preparation that is necessary to ensure a positive student experience, students who wish to drop the course after they have accepted a seat must drop by Monday, November 30, 2020 at 3:00 p.m. After that point, students must receive permission from both the course professor and Assistant Dean for Experiential Education to drop the course. Permission will only be granted when remaining enrolled in the course would cause significant hardship for the student. Students who are enrolled but do not attend the first class session will be withdrawn from the course.
LAW 1620 v00 Campaigning for Public Office (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201620%20v00)
J.D. Seminar | 2 credit hours
This simulation course will provide students with the fundamentals of organizing, managing, and executing an effective campaign for political office, within a bipartisan context grounded in ethical public service. Each enrolled student must identify a local, state, or federal public office that they plan to run for (plans to run for this office can be tentative and prospective). Students will then learn campaign basics, message development and delivery, fundraising strategies, communication and media strategies, applicable campaign finance and election laws, and debate preparation. Students will prepare and give “stump” speeches and participate in a simulated candidate forum. Students will also develop policy platforms and learn how to assess and respond to the needs of a constituency and the public.

Note: FIRST CLASS ATTENDANCE IS MANDATORY. Enrolled students must be in attendance at the start of the first class session in order to remain enrolled. Waitlisted students must be in attendance at the start of the first class session in order to remain eligible to be admitted off the waitlist.

LAW 500 v00 Center for Applied Legal Studies (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20500%20v00)
J.D. Clinic | 10 credit hours
See the Center for Applied Legal Studies website (https://www.law.georgetown.edu/experiential-learning/clinics/center-for-applied-legal-studies) for more detailed information about the clinic.

For registration-specific supplemental materials, please see the Center for Applied Legal Studies PDF (https://georgetown.app.box.com/s/3566e1cla4dv2bwv9wg20m8b1d6l05st).

For information about clinic registration generally, please see the Clinic Registration Handbook (https://georgetown.box.com/s/y9f8wg3jyqcuynfip3yt1r6jn9pyv6).

Mutually Excluded Courses: Students may not concurrently enroll in this clinic and an externship or a practicum course.

LAW 528 v02 Civil Rights Clinic (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20528%20v02)
J.D. Clinic | 12 credit hours
Please see the Civil Rights Clinic website (https://www.law.georgetown.edu/experiential-learning/clinics/civil-rights-clinic) for more detailed information about the program.

For registration-specific supplemental materials, please see the Civil Rights Clinic PDF (https://georgetown.app.box.com/s/n7c77mklv8tywmllfe6cm2k0rv8yo1).

For information about clinic registration generally, please see the Clinic Registration Handbook (https://georgetown.box.com/s/y9f8wg3jyqcuynfip3yt1r6jn9pyv6).

Mutually Excluded Courses: Students may not concurrently enroll in this clinic and an externship or a practicum course.

LAW 3078 v00 Commercial Space Law (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%203078%20v00)
LL.M Seminar (cross-listed) | 2 credit hours
This course will provide an overview of U.S. domestic legal regimes that govern commercial spaceflight activities, including those managed by the Federal Aviation Administration, Federal Communications Commission, Department of Commerce, U.S. Defense Department and State Department. The course will examine existing regulations and statutes as well as current discussions about changes to policy and law to address the evolving nature of the space industry and U.S. national space priorities. Examples include the Space Force, space traffic management, and oversight of non-traditional commercial activities in light of international treaty obligations.

Recommended: Prior or concurrent enrollment in administrative law, regulatory law or international law.

LAW 528 v01 Communications and Technology Law Clinic (IPR) (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20528%20v01)
J.D. Clinic | 12 credit hours
Please see the Communications and Technology Law Clinic (IPR) website (https://www.law.georgetown.edu/experiential-learning/clinics/communications-technology-law-clinic-ipr) for more detailed information about the program.

For registration-specific supplemental materials, please see the Communications and Technology Law Clinic (IPR) PDF (https://georgetown.app.box.com/s/u4z58qhd1x5kywox56mo7xgda0v0gu).

For information about clinic registration generally, please see the Clinic Registration Handbook (https://georgetown.box.com/s/y9f8wg3jyqcuynfip3yt1r6jn9pyv6).

Mutually Excluded Courses: Students may not concurrently enroll in this clinic and an externship or a practicum course.

LAW 950 v01 Complex Securities Investigations (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20950%20v01)
LL.M Course (cross-listed) | 2 credit hours
The course is designed to provide a practical survey of a complex securities investigation from inception through the Wells process, civil and criminal charging decisions, and trial. Representing a public company, its officers, employees or directors requires a thorough understanding of the tools and strategies employed by the civil and criminal regulators. We will consider a variety of common practice issues including managing concurrent SEC and DOJ investigations, structuring and conducting the internal investigation; responding to SEC document subpoenas; conducting witness interviews; and, the application of the corporate privilege, attorney-client privilege, work product doctrine, and governmental privileges. The self-reporting and professional responsibility provisions of Sarbanes-Oxley and the SEC’s cooperation initiative present a variety of difficult practice issues that are critical to a lawyer’s fundamental responsibility to represent solely the client’s interests. Students will gain practical knowledge of the issues and opportunities arising through interaction and negotiation with the SEC and DOJ during the investigative process, and the strategic decisions of waiver and cooperation to achieve the optimal result for the client.

Recommended: Criminal Justice (or Democracy and Coercion) or Criminal Procedure or a course in White Collar Crime
President Franklin D. Roosevelt called the Fair Labor Standards Act (FLSA) of 1938 “the most far-reaching, far-sighted program for the benefit of workers ever adopted in this or any other country.” The historic FLSA established the minimum wage, created a standard workweek, outlawed child labor, and instituted certain work safety protections for minors. Over eighty years later, many argue that the law is too rigid for today’s 21st-century workplace and the gig economy. Others contend that the law must be strengthened to better protect workers, many of whom face job insecurity; wage theft; or lack of health, retirement, and unemployment benefits. Most agree that the law needs to be updated -- but how?

In this dynamic and realistic Week One simulation, students will prepare for and conduct a Congressional hearing on updating the FLSA. Working in teams, students will gain experience in the key components of preparing for and conducting a hearing including writing, delivering, and responding to opening statements, testimony, and questions. Students will play the roles of witnesses such as Department of Labor leadership, business leaders, worker advocates, and others, as well as Democratic and Republican Congressional Members of Congress/staff. Additional Members of Congress will be played by outside experts. Upperclass teaching fellows will help guide student preparation for the hearing and serve as Members of Congress in the simulation.

Note: This course is mandatory pass/fail, and does NOT count against the 7-credit pass/fail limit for J.D. students.

This optional, elective course is for first-year J.D. students only, who will enroll via the Live Registration process. ATTENDANCE AT ALL CLASS SESSIONS IS MANDATORY. All enrolled and waitlisted students must be in attendance at the start of the first class session in order to be eligible for a seat in the class and must attend each class session in its entirety. For more information, please see the Week One website (https://www.law.georgetown.edu/experiential-learning/simulations/first-year-week-one-simulations). Due to the intensive nature of the course, the small-group, team, and individual work that is involved, and the preparation that is necessary to ensure a positive student experience, students who wish to drop the course after they have accepted a seat must drop by Monday, November 28, 2022 at 3:00 p.m. After that point, students must receive permission from both the course professor and Assistant Dean for Experiential Education to drop the course. Permission will only be granted when remaining enrolled in the course would cause significant hardship for the student. Students who are enrolled but do not attend the first class session will be withdrawn from the course.

LAW 1717 v00 Congressional Procedure (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201717%20v00)
J.D. Course | 3 credit hours
There are many procedure courses in law schools. There is civil procedure, a required course. There is administrative procedure, widely seen as an important course. Congressional procedure does not receive enough attention in law schools. This course is an introduction to that procedure and its importance for lawyers and leaders. Today, we live in a Republic of Statutes. The common law, learned in the first year, has largely been supplanted by statutes at both the state and federal levels. To interpret statutes, whether one is in a court or an agency, or just reading the newspaper, one must understand the process by which the statute is made. One cannot intelligently read a trial transcript without understanding basic trial process. The same is true of statutes. The purpose of this course, then, is not to consider congressional procedure for its own sake, but as a means to understand difficult problems in statutory interpretation.

Mutually Excluded Courses: Students may not receive credit for this course and Legislation taught by Professor Nourse, Congress and the Administrative State or Congressional Procedure and Statutory Interpretation Seminar.

LAW 1609 v00 Constitutional and Statutory Interpretation Seminar (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201609%20v00)
J.D. Seminar | 2-3 credit hours
Analyzing text is a deeply important part of legal practice in public law, whether statutory or constitutional law. It cuts across a wide variety of subject matter areas, from very basic aspects of the Constitution to any statutory topic imaginable. Whatever the subject matter, whether health care law, presidential emoluments, or internet privacy, certain problems of legal analysis recur. How should courts analyze legal texts? Where should judges go to look for meaning when the text is vague or ambiguous? Should texts be updated to reflect current norms? What does it mean to look for the drafter’s intent? Should approaches toward statutory and constitutional text be symmetrical or not? This seminar will introduce students to these problems and provide essential skills for reading both constitutional and statutory text. Materials will be provided by the instructor or invited guests. Students will be graded on short reaction papers due every two weeks. Given the theoretical nature of the topic, law review students are especially encouraged.

Note: This seminar requires a paper. J.D. students must register for the 3 credit section of the seminar if they wish to write a paper fulfilling the Upperclass Legal Writing Requirement. The paper requirements of the 2 credit section will not fulfill the J.D. Upperclass Legal Writing Requirement.
trading in derivatives markets, regulators, and the courts. With the same questions of law confronting attorneys advising entities and systems and high-frequency trading in commodity markets; and (iii) called excessive speculation; (ii) the increasing use of automated trading as preventing market manipulation, disruptive trading practices, and so-

to draft legal papers and/or briefs in current election law matters. Assignments will be based on pending cases and matters, but will involve a wide range of election law issues raising important questions of constitutional and statutory interpretation.

**Prerequisite:** J.D. students must complete the required first-year program prior to enrolling in this course (part-time and interdivisional transfer students may enroll prior to completing Criminal Justice, Property, or their first-year elective).

**Recommended:** Prior enrollment in Constitutional Law II.

**Mutually Excluded Courses:** Students may not concurrently enroll in this practicum course and a clinic or another practicum course. Students may concurrently enroll in this practicum course and an externship.

**Note:** This practicum course is open to LL.M. students, space permitting. Interested LL.M. students should email the Office of the Registrar (lawreg@georgetown.edu) to request admission.

This practicum course is suitable for evening students who can attend seminar and participate in 10 hours/week of project work. This is a four-credit course. Two credits will be awarded for the two-hour weekly seminar and two credits will be awarded for approximately 10 hours of project work per week, for a minimum of 11 weeks. Both the seminar and the project work will be graded. Students who enroll in this course will be automatically enrolled in both the seminar and project components and may not take either component separately. After Add/ Drop, a student who wishes to withdraw from a practicum course must obtain permission from the faculty member and the Assistant Dean for Experiential Education. The Assistant Dean will grant such withdrawal requests only when remaining enrolled in the practicum would cause significant hardship for the student. A student who is granted permission to withdraw will be withdrawn from both the seminar and project.
LAW 1472 v00 Energy Law and Policy (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201472%20v00)
J.D. Seminar (cross-listed) | 2 credit hours
This course will present the framework for the governance of energy production, distribution and use in the United States, and provide a foundation for future coursework on these subjects. While the course will focus primarily on U.S. law, it will address some international subjects and examples. Topics will include the evolving U.S. fuel mix and market dynamics, utility restructuring and grid modernization, roles of state and federal governments, the role of different policymakers and regulatory bodies in overseeing U.S. energy systems, relevant environmental laws, and emerging policy issues. There are no prerequisites, although experience with administrative law or environmental law would be beneficial.

Learning Objectives:

1. Substantive expertise
   - The physical nature of the energy system (how it is produced, distributed, and used)
   - Common terminology and acronyms related to energy and its regulation
   - Key statutes and regulations applying to energy production, distribution and use, and key cases interpreting this legal framework
   - Current issues being debated in energy law
2. Understanding of governance structure
   - The roles and responsibilities of different policymakers and regulators (e.g., economic regulators, environmental regulators, natural resource managers, legislators) and how they relate to each other
   - State and federal responsibilities in overseeing the energy system
3. Legal and policy skills
   - How to explore questions of regulatory authority by state and federal agencies
   - How to write analytically about legal and policy questions

Recommended: Administrative Law, Environmental Law.

LAW 142 v02 Energy Problems Seminar: Climate Change and Other Energy Issues (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20142%20v02)
J.D. Seminar (cross-listed) | 2-3 credit hours
This seminar considers economic, political, and legal aspects of current problems in the petroleum, natural gas, electrical, nuclear, coal and alternative energy industries with particular focus on global warming and the impact of climate change policies on energy use in the United States and abroad. In addition to the connection between global warming and energy, the seminar will examine: (1) the nexus between U.S. energy policy and Middle East wars and diplomacy; (2) the future of energy deregulation; (3) tensions between state and federal efforts to address energy issues; and (4) the problems and prospects of introducing new fuels and fuel sources, including nuclear, hydrogen, and renewables, into the U.S. and world economies. As these subjects sweep across the entire economy, they touch upon several fields of law: administrative law, antitrust, constitutional law, environmental law, oil and gas law, public utility regulation, and international law (both public and private).

Note: This seminar requires a paper. Students must register for the 3 credit section of the seminar if they wish to write a paper fulfilling the Upperclass Legal Writing Requirement. The paper requirements of the 2 credit section will not fulfill the Upperclass Legal Writing Requirement. The 3 credit section is open to J.D. students only and non-degree students may not enroll.

LAW 2009 v01 Energy Trading and Market Regulation (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%202009%20v01)
LL.M Seminar (cross-listed) | 2 credit hours
Energy markets are dynamic and growing rapidly, creating new business opportunities and legal challenges not only for traditional energy companies such as utilities, pipelines, natural gas producers and independent power producers, but also for newer market entrants including investment banks, demand response providers, smart grid and renewable energy companies, storage providers, hedge funds, and large industrial and commercial consumers of natural gas and electricity. The course will focus on the economic regulation of physical energy markets by the Federal Energy Regulatory Commission (FERC), primarily the regulation of transmission, price and competition in the electric and natural gas markets. We will examine six main areas: (i) restructuring and deregulation under the Federal Power Act and Natural Gas Act; (ii) the current model of energy market enforcement and compliance derived, in large part, from securities market regulation; (iii) the legal, regulatory and market responses to ongoing challenges, including market based pricing, market structure and the prevention of market manipulation and market power abuse; (iv) foundational laws and policies governing energy markets and non-discriminatory transmission by wire and pipeline of the electricity and natural gas commodities; (v) “hot topics” such as carbon pricing in organized wholesale electricity markets, the shale gas revolution, the impact of subsidies for certain resources, pipeline and electric transmission infrastructure development and cost allocation, and integrating demand resources and renewables; and (vi) the constant interplay among Congress, federal and state energy regulatory agencies and market participants. Students will gain an appreciation for the legal and market challenges confronted by market participants. Some sessions will feature guest lecturers. There will be no final examination. Instead, each student’s grade will be based on a final paper that takes a position on a key legal or policy issue and defends that position persuasively, two quizzes during the semester, and class participation.
LAW 528 v03 Environmental Law and Justice Clinic (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20528%20v03)
J.D. Clinic | 12 credit hours
Please see the Environmental Law and Justice Clinic website (https://www.law.georgetown.edu/experiential-learning/clinics/our-clinics/environmental-law-and-justice-clinic) for more detailed information about the program.

For registration-specific supplemental materials, please see the Environmental Law and Justice Clinic PDF (https://georgetown.app.box.com/s/1u7bh1ny76z1p7yu2ouh44ccdg31l8uj).

For information about clinic registration, please see the Clinic Registration Handbook (https://georgetown.box.com/s/y9f8wg3jqcuynevip3ytyrl6nj9qpyv6).

Mutually Excluded Courses: Students may not concurrently enroll in this clinic and an externship or a practicum course.

LAW 3144 v00 Federal Advocacy in Technology Law and Policy (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%203144%20v00)
LL.M Seminar (cross-listed) | 2 credit hours
Students who take this course will better understand stakeholder politics; federal legislative, regulatory, and enforcement processes; and the advocacy skills needed to achieve policy outcomes in the interrelated fields of technology, telecommunications, and media (“TTM”). Students will gain hands-on experience practicing technology advocacy. The course first reviews key issues in technology policy and advocacy, such as competition, content moderation, net neutrality, privacy, AI & bias, and cybersecurity.

Armed with the basics of current technology policy issues, students then learn advocacy tools to “make” technology policy. Students will review and draft collateral materials used for technology policy advocacy, including white papers, talking points, comments, “op/eds,” earned media coverage, and more, gaining an appreciation for the differences from, and complementary relationship with, traditional legal materials and legal practice. Students will be introduced to the legislative process (committee hearings and markups, bicameral action, budget procedure); independent agency rulemaking and adjudication (comments, ex parte presentations, Administration and congressional input); relevant enforcement proceedings (Department of Justice and Federal Trade Commission merger review); and related advocacy in the courts (amicus briefs).

This is a skill-intensive course with writing assignments, workshops, presentations, peer support, and simulations. It will have a final assessment with a written and oral component. There are no prerequisite courses required. Classes will incorporate pre-class preparations and in-class skill-building exercises.

Mutually Excluded Courses: Students may not receive credit for both this course and Technology Policy and Practice.

LAW 193 v03 Federal Banking Regulation: Modern Financial Institutions and Change (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20193%20v03)
J.D. Course (cross-listed) | 4 credit hours
Banking Regulation today is at the cutting edge of federal power and regulatory experimentation. The financial collapse of 2008 was a near-death experience for federal banking regulators. We approach the subject with an intense focus on the dynamics of three critical pieces of the recent financial crisis: first, the development and growth of private markets for financial products; second, experimental regulatory strategies for controlling private risk taking and its effects on the integrated global financial system; third, the reemergence of areas of unique forms of hybrid power that combines private markets and government regulation.

This course examines the regulation of financial intermediaries. The stated goal of regulation is to ensure systemic stability and to pursue consumer protection. We will ask how well the balance between systemic stability and consumer protection had been maintained before the crisis of 2008. The course is devoted to federal regulation of banks, bank holding companies, financial holding companies and their affiliates. Topics include restrictions on activities of banks, holding companies and their affiliates, the history of and policy rationales for geographic restrictions on banking; special antitrust regulation of banks, debates about the role of capital adequacy requirements, community reinvestment requirements, bank supervision, and failed banks. With the market and legal changes of the past decade, the traditional market barriers between commercial banks and other financial institutions were largely dismantled. We will ask, did the federal response to the crisis produce a new paradigm for financial regulation? If it did not, why not?

The global financial crisis of 2008 provides a fertile laboratory for examining the fractured financial regulatory system, and the proposals for reform. The course will examine selected topics from the legislative agenda for reforming the financial regulatory system. These topics include among others, the role of subprime home mortgage lending and mortgage-backed securities in creating systemic risk, the consumer regulatory responsibilities of the Federal Reserve. We will identify some questions arising from the role of private credit rating agencies and securitizations in precipitation the financial collapse. and the competing strategies for controlling private risk taking and its effects on the private markets for financial products; second, experimental regulatory

Mutually Excluded Courses: Students may not receive credit for both this course and Financial Services: Regulation in the Age of Disruption or Banking and Financial Institutions Regulation or Financial Regulation and Financial Crises.

Note: All students are expected to attend class regularly.
LAW 193 v05 Federal Banking Regulation: Modern Financial Institutions and Change (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20193%20v05)
J.D. Course (cross-listed) | 4 credit hours
Regulation of financial institutions today is at the cutting edge of federal power and regulatory experimentation. The financial collapse of 2008 was a near-death experience for federal banking regulators. We approach the subject with an intense focus on the dynamics of three critical pieces of the recent financial crisis: first, the development and growth of private markets for financial products; second, experimental regulatory strategies for controlling private risk taking and its effects on the integrated global financial system; third, the reemergence of areas of unique forms of hybrid power that combines private markets and government regulation.

This course examines the regulation of financial intermediaries. The stated goals of regulation is to ensure systemic stability and to pursue consumer protection. We will ask how well the balance between systemic stability and consumer protection had been maintained before the crisis of 2008, and whether post-crisis reform has done a better job.

The course is devoted to federal regulation of banks, bank holding companies, financial holding companies and their affiliates. Topics include restrictions on activities of banks, holding companies and their affiliates, the history of and policy rationales for geographic restrictions on banking; special antitrust regulation of banks, debates about the role of capital adequacy requirements, community reinvestment requirements, bank supervision, and failed banks. With the market and legal changes of the past decade, the traditional market barriers between commercial banks and other financial institutions were largely dismantled. We will ask, did the federal response to the crisis produce a new paradigm for financial regulation in the United States, Europe, and the rest of the world? Where it did not, why not?

Mutually Excluded Courses: Students may not receive credit for both this course and Financial Services: Regulation in the Age of Disruption or Banking and Financial Institutions Regulation or Financial Regulation and Financial Crises.

Note: All students are expected to attend class regularly.

LAW 530 v00 Federal Legislation Clinic (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20530%20v00)
J.D. Clinic | 10 credit hours
Please see the Federal Legislation Clinic website (https://www.law.georgetown.edu/experiential-learning/clinics/federal-legislation-clinic) for more detailed information about the program.

For registration-specific supplemental materials, please see the Federal Legislation PDF (https://georgetown.app.box.com/s/in812e5v0pl06u1[qry59dxej40xxcvv).

For information about clinic registration, please see the Clinic Registration Handbook (https://georgetown.box.com/s/y9f8wg3jvcucyneip3ytv6[j9pyv6].

Mutually Excluded Courses: Students may not concurrently enroll in this clinic and an externship or a practicum course.

LAW 1166 v00 Federal Litigation Practice: Litigating Challenges to Federal Agency Decisions (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201166%20v00)
J.D. Seminar | 3 credit hours
The majority of civil cases involving the federal government arise from challenges to agency decisions ranging from contractor selection by government procurement officials to project approvals by both civilian and military agencies under various regulatory schemes implementing the nation’s health, finance, and environmental laws. This one-semester, three credit course will provide students with the opportunity to learn in a variety of factual contexts how to litigate federal cases challenging agency decision making on the administrative records prepared by agencies to support their decisions. Each class will focus on a particular stage in the litigation process. Students will be given reading and related litigation exercises that will be carried out in class. The class will culminate in arguing a motion for summary judgment on the administrative record in a courtroom setting.

This class is designed for students who are interested in gaining practical experience in litigating for or against the federal government. It will be of special help to students who are seeking internships or careers working for the Department of Justice, agencies, or private firms that focus on litigating over government regulatory decisions. This class is open to upper-level students who have taken Civil Procedure. Completing a class involving administrative law is helpful but not required.

Learning Objectives:

Develop and enhance analytical, writing, and oral argument skills associated with litigating on behalf of or against federal agencies.

Prerequisite: Civil Procedure (or Legal Process and Society).

Recommended: Administrative Law.

Note: Students may not withdraw from this class after the add/drop period ends without the permission of the professor.

LAW 635 v00 Federal Money: Budget Process and Appropriations Law (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20635%20v00)
J.D. Course (cross-listed) | 3 credit hours
The federal budget is where the nation’s priorities are expressed. It allows the federal government to operate and shapes what the government will do. It is also an important source of revenue for state and local governments and thus affects their own policy choices. This course provides an introduction to the laws, rules, and practices that govern how the federal budget is put together and how the budget is executed. We will study both traditional “regular order” and contemporary realities. We will pay particular attention to sites of contestation and control with respect to the key institutional players of the legislative branch (including different committees within both the House and Senate, party leadership, the Congressional Budget Office, and the Government Accountability Office) and the executive branch (including the President, the Office of Management and Budget, agencies, and inspectors general). We will also study the role of the courts in appropriations law.

Note: No accounting or budget background is needed.
This seminar will explore selected topics in Civil Procedure, Federal Courts, and Administrative Law in depth. The seminar will focus on topics that have recently gained attention in the Supreme Court or that may arrive in the Supreme Court in the near future. Each class will relate to only one or two such topics. Examples of possible topics include nondelegation, federal preemption, arbitration clauses and the Federal Arbitration Act, personal jurisdiction, Chevron or other doctrines of deference to agencies, congressional power over Tribes and/or States, Dormant Commerce Clause limits on congressional power, class action scope and limits, and the major questions doctrine. Depending on the topic, we may read Supreme Court decisions, scholarly literature, or Supreme Court briefs. There will be one major writing assignment: a paper of approximately 20-25 pages in length that addresses a topic in civil procedure, federal courts, or administrative law. The grade in the course will be based substantially on the final paper, but may be adjusted upward or downward one-half grade based on class participation. We recommend but do not require completion of or simultaneous enrollment in Administrative Law or Federal Courts. (NB: This two-credit course does not fulfill the J.D. Writing Requirement.)
The global financial crisis of 2008 resulted in massive human suffering—9 million unemployed in the U.S. alone, and millions lost their homes. It also fundamentally altered financial regulation and American politics and reshaped social and economic dynamics—for example, the crisis led to the formation of the Tea Party, contributed significantly to political polarization and increased economic inequality.

In 2020, the coronavirus pandemic, which has caused even greater human suffering, triggered economic and financial consequences that almost led to another financial crisis. The reforms implemented after 2008, as well as the implementation of emergency programs used in 2008, were likely the reasons we did not have another financial crisis.

Why did the 2008 crisis happen? Why, throughout our history, have we periodically experienced financial crises? What does this history teach us about the adequacy of financial regulation, and whether regulatory failures contribute to financial crises?

We will begin by briefly reviewing the historical development of the United States banking industry, and the regulatory structure governing it, to get an appreciation of the economic and political forces that have shaped the regulation of our financial system. This will include reviewing past financial crises—the Panic of 1907 and the Great Depression and the responses to them, including the development of the Federal Reserve System, deposit insurance and other major reforms.

We will then focus on the 2008 financial crisis. We will examine the forces that produced the complex financial system of the early 21st century, including the rise of the shadow banking industry and the growth of derivatives. We will examine the response to the crisis, which included drawing on emergency powers that were first created by Congress in response to earlier financial crises, as well as new authorities created in response to the events of 2008. We will look at some of the difficult choices faced by government officials in responding to the crisis, as well as the role of individual accountability for behavior that contributed to the crisis. We will also examine the reforms implemented as a result of the crisis.

We will then turn to the pandemic, and look at its economic and financial consequences. Why was there a risk of another financial crisis? Did the reforms of 2008 help prevent a crisis? How was the government’s emergency response to the financial stresses similar to or different from the 2008 response?

Finally, having started the course with a look at the beginnings of the American financial system, we will end with what many predict is the future: cryptocurrencies and central bank digital currencies, the development of which has been accelerated by both the 2008 crisis and the pandemic. Will central bank digital currencies replace cash? If so, will they make our financial system more or less stable? Can they make it more inclusive?

The course will include sessions with guest speakers who have been responsible for some of the critical policy decisions that we will discuss.

**Strongly Recommended:** Corporations.

**Mutually Excluded Courses:** Students may not receive credit for both this course and the J.D. courses, Federal Banking Regulation: Modern Financial Institutions and Change, or the LL.M. course, Financial Regulation and Financial Crises.
Seminar readings will illuminate the relationship between the financial marketplace and oft-marginalized communities and allow students to assess whether effective solutions to certain inequities lie in Fintech, fundamental policy reforms, or both. This course covers topics such as payment systems, credit markets, financial advising, savings, and security investing. It focuses on the U.S. marketplace, but will occasionally reference trends in international markets for comparative analysis. Readings are primarily drawn from legal, economic and sociological research, regulatory and legislative reports, cases, and popular news media.

The goal of this seminar is for students to develop views on the purpose and role of Fintech, the objectivity of financial markets and regulation, and whether financial democratization is a necessary or achievable aim for market providers. Students will further hone their critical analysis, research and writing, and public speaking skills.

Note: ATTENDANCE IS MANDATORY AT ALL CLASS SESSIONS. Enrolled students must be in attendance at the start of the first class session in order to remain enrolled. Waitlisted students must be in attendance at the start of the first class session in order to remain eligible to be admitted off the waitlist. All enrolled students must attend each class session in its entirety. Failure to attend the first class session in its entirety will result in a drop; failure to attend any subsequent class session in its entirety may result in a withdrawal.

This seminar requires a paper. J.D. students must register for the 3 credit section of the seminar if they wish to write a paper fulfilling the Upperclass Legal Writing Requirement. The paper requirements of the 2 credit section will not fulfill the J.D. Upperclass Legal Writing Requirement.

Financial services can be broken down into three distinct subsectors: 1) Insurance; 2) Retail Banking; and 3) Investment/Advisory Banking. This course will focus on how technology is transforming both retail and investment/advisory banking. Retail banking law was designed for a world of a relatively small number of sophisticated investors. This traditional schema is being transformed, rapidly.

Moreover, in the financial services industry lines are blurring – financial tech companies are expanding financial services ecosystems and traditional financial services companies are expanding their digital capabilities. New business models are being created that leverage the data and capabilities afforded by the Internet, and seemingly diverse industries ranging from telecom to traditional banks are competing over similar financial services activities.

Crowdfunding, mobile payments, online lending, robo-advisors, and Bitcoin are new phenomenon that challenge existing regulatory structures. The SEC, Treasury Department, Office of Comptroller of Currency, Financial Industry Regulatory Authority, Federal Deposit Insurance Commission, Federal Reserve Bank, Consumer Financial Protection Bureau, and Federal Trade Commission are just a few of the regulatory bodies that are increasingly exploring Fintech developments. Moreover, the courts have been faced with challenges to several federal and state laws that were written before modern technological innovations took hold and challenged existing concepts of Federalism. This class will focus in on these particular challenges, will question existing regulatory bodies, approaches and standards, as well as discuss the practicalities of alternative regulatory structures and rules.

The class will proceed in 4 parts. Part 1 will be an introduction to retail banking law and disruptions that are occurring due to Fintech. Part 2 will be an introduction to investment/advisory banking law and disruptions that are occurring due to Fintech. Part 3 will address cross-cutting horizontal disruptions. And, finally Part 4 will involve a high-level assessment of regulatory structures and approaches for Fintech. After this course, students should have a strong baseline knowledge of the myriad of legal and policy issues that exist in the Fintech arena.
LAW 1208 v00 Food Law Seminar (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW %201208%20v00)
J.D. Seminar (cross-listed) | 2-3 credit hours
This seminar introduces students to the laws and regulations that govern our food. The seminar will focus mostly, but not exclusively, on the federal regulatory framework for food. Topics will include the legal definition of food, rules on food labeling, standards for food safety, provisions for food security, and regulation of the environmental consequences flowing from the agricultural practices that produce our food. Beyond the law itself, we will consider the scientific, economic, and ethical principles implicated by legal decisions concerning food.

Note: This seminar requires a paper. J.D. students must register for the 3 credit section of the seminar if they wish to write a paper fulfilling the Upperclass Legal Writing Requirement. The paper requirements of the 2 credit section will not fulfill the J.D. Upperclass Legal Writing Requirement.

LAW 202 v00 Government Contracts (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW %20202%20v00)
J.D. Course (cross-listed) | 2 credit hours
This course analyzes the basic considerations in contracting with the federal government, including the sovereign’s power to contract, the applicable statutes, regulations and executive orders, and sovereign immunity. Material covers methods of acquisition: sealed bidding or negotiation (competitive proposals); requests for quotations; Multiple Award Schedule (MAS) contracting; the problems of offer, acceptance, and consideration; as well as the authority of government agents to contract. The materials also focus on the problems of contract performance, including changes; delays and suspensions of work; contract termination either for contractor default or for government convenience; and equitable adjustments and allowable costs. There is emphasis throughout the course on the practical as well as the substantive problems, including the dispute procedures before the boards of contract appeals and appeals to the U.S. Court of Federal Claims, as statutorily mandated by the Contract Disputes Act of 1978; extraordinary rights and remedies, including recovery for defective pricing and Public Law 85-804 requests; and bid protest proceedings before the agencies, Government Accountability Office (GAO), and the U.S. Court of Federal Claims. The course also includes a discussion of the changes to the government contracting process, to allow for “commercial item” contracting, as a result of the Federal Acquisition Streamlining Act of 1994 and the Federal Acquisition Reform Act of 1996.

Prerequisite: Contracts (or Bargain, Exchange, and Liability).

LAW 1028 v00 Health Care Fraud and Abuse Seminar (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW %201028%20v00)
J.D. Seminar (cross-listed) | 2 credit hours
One-fifth of the U.S. economy centers around health care industry sectors. This seminar examines criminal, civil and administrative tools used by federal and state enforcement authorities to police the U.S. healthcare system. We will focus on cases brought under federal and state False Claims Acts (FCA), the Anti-Kickback Statue (AKS), Stark laws, Federal Food Drug and Cosmetic Act (FDCA), and Foreign Corrupt Practices Act (FCPA). The seminar provides a survey of the enforcement activities of the U.S. Department of Justice (DOJ), the Office of Inspector General at Department of Health and Human Services (OIG), and state Medicaid Fraud Control Units (MFCUs) in matters against pharmaceutical and medical device manufacturing companies, physicians, hospitals, clinical practices, nursing homes, laboratories, and others. The seminar materials thoroughly cover the statues, safe-harbors, and regulations that govern the health care industry. We will also discuss risk mitigation strategies and compliance program best practices across industry sectors to provide insight into the impact enforcement has on (1) clinical decision-making, (2) costs to providers, payers, and patients, (3) patient safety, and (4) quality of care. In an effort to maintain a broad perspective with the diverse and frequently changing legal landscape in the area, in addition to the case book, materials discussed and presented in this course draw from news reports, trade publications, and U.S. government agency materials.

The class requires a paper of approximately 20-25 pages in length.

Recommended: Criminal Justice (or Democracy and Coercion) or Criminal Procedure.

LAW 3140 v00 Health Equity and Social Justice (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW %203140%20v00)
LL.M Seminar (cross-listed) | 2 credit hours
This course will examine the social, legal, and economic systems in the United States that have precipitated health inequities for different populations throughout history. Students will develop an intense understanding of U.S. public health law and policy constructs and the varied social determinants of health that affect public health outcomes by exploring how past and current U.S. law and policy perpetuate disparities. This course will also explore how legal and policy reform can be utilized to promote health equity and eliminate injustices across populations. Topics covered in the course include health disparities in the U.S. among LGBTQ, immigrant, rural, and minority populations; substance use policy; maternal and child health; and environmental health. The course will utilize various learning modalities such as research review, discussion, case studies, and guest lecturers. By the conclusion of the semester, students will be equipped with tools to leverage the law to improve health outcomes and the skills necessary to become successful practitioners working at the intersection of public health administration and law.
**LAW 627 v00 Health Justice Alliance Law Clinic** (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20627%20v00)
J.D. Clinic | 10 credit hours
Please see the Health Justice Alliance Law Clinic website (https://www.law.georgetown.edu/experiential-learning/clinics/health-justice-alliance-clinic) for more detailed information about the program.

For registration-specific supplemental materials, please see the Health Justice Alliance Law Clinic PDF (https://georgetown.app.box.com/s/sayjo4vhr2wq8zcmlzljeseky6d0opn1).

For information about clinic registration generally, please see the Clinic Registration Handbook (https://georgetown.box.com/s/y9f8wg3jvcujnevip3yttf6jn9opyv6).

**Mutually Excluded Courses:** Students may not concurrently enroll in this clinic and an externship or a practicum course.

---

**LAW 1793 v00 Housing Law and Policy Seminar** (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201793%20v00)
J.D. Seminar (cross-listed) | 2-3 credit hours
In 1949, Congress enacted a broad Housing Act with the goal of providing “a decent home and a suitable living environment for every American family.” In this course we will examine the laws and policies that have both advanced and impeded the United States’ achievement of this goal. While the course focuses on the effects of housing laws and policies on low-income households and communities of color, we examine these effects with sharp attention paid to the ways in which housing laws and policies have privileged higher income households and white communities. Through historical, sociological, political, and legal lenses, we examine housing law and policy holistically from Reconstruction to the present. Throughout the course, we will consider the role of affected communities in advocating for and/or resisting the laws and policies adopted.

Three broad themes animate this course. First, we consider the question of a “right to housing,” including the extent to which such a right has been recognized, and the ways in which the absence or recognition of such a right has influenced law and policy. Second, we discuss and debate the relative roles of the free market, regulation, and subsidization in expanding access to safe and affordable housing. Third, we study the centrality of race to housing law and policy in the United States, including the historical and present role of racism in shaping housing outcomes. Specific class topics include, among others, federal public housing and housing subsidies, exclusionary and inclusionary zoning, federal fair housing/antidiscrimination law, homeownership, homelessness, eviction, and substandard housing condition regulation. Across this range of topics, we will engage in both doctrinal and policy analysis.

**Learning Objectives:** By the end of this course, I hope you will be able to describe and discuss the major federal laws and policies that have shaped housing outcomes in the United States. I further hope that you will gain an understanding of the socio-political context in which such housing laws and policies developed, and that you will be able to describe the role of grassroots advocacy in pushing forward and/or resisting particular policies. Throughout this course, you will also gain a critical understanding of the role of race and racism in shaping housing law and policy.

**Note:** This seminar requires a paper. J.D. students must register for the 3 credit section of the seminar if they wish to write a paper fulfilling the Upperclass Legal Writing Requirement. The paper requirements of the 2 credit section will not fulfill the J.D. Upperclass Legal Writing Requirement.

---

**LAW 1603 v00 How to Regulate** (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201603%20v00)
J.D. Course | 3 credit hours
Regulation is pervasive. But, governments routinely over-regulate in some areas, under-regulate in others, and also mis-regulate – by using solutions that really don’t “fit” the underlying problem, or cause more problems than they solve. When it comes to regulation, design details matter – and so does implementation. The result is that not all regulation is good – and some of it ranges from bad to awful. Simply stated, markets fail, but so does regulation. This course systematically evaluates these issues, using a wide array of real-world examples.

**Mutually Excluded Courses:** Students may not receive credit for this course and the first-year elective by the same name.
LAW 037 v00 Immigration Law and Policy (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20037%20v00)
J.D. Course (cross-listed) | 3 credit hours
This course will examine the U.S. immigration system through legal and policy perspectives. We will explore the source, scope and constitutional limits of congressional power to regulate immigration; the executive branch implementation of immigration legislation, particularly procedures for entry and removal, and the extent of, as well as constitutional constraints on, Presidential power; and the administrative and judicial review of executive branch action. Close attention will be paid to how membership laws and policies are established and implemented: What laws and policies govern U.S. citizenship? Who is eligible to become a legal immigrant? How are annual admissions numbers set? How and why are family and employment priorities created? How does the U.S. protect refugees? With respect to the arrival of unaccompanied children from abroad, we will consider the laws and policies that govern how the U.S. government treats them. Unauthorized migration will also be examined to understand why some migrants do not use the legal route into the U.S. and what laws and policies the U.S. has in place to deter such unlawful movements at the border and control unlawful presence in the interior. We will analyze the impact of the major 1996 immigration control legislation and its implementation, with particular attention to detention and removal. We will closely examine the role of the Justice Department's Immigration Courts, with special attention to access to justice issues. We will explore the extraordinary need for, and challenges of, immigration law reform, as well as the particular situation of the Dreamers, children without lawful immigration status brought to and raised in the United States by their parents. Finally, we will assess the various changes implemented by the Trump and Biden Administrations, particularly in connection with the treatment of asylum seekers at the U.S.-Mexico border, the resettlement of refugees from abroad, and the removal of unauthorized immigrants.

Mutually Excluded Courses: Students may not receive credit for both this course and National Security Law Through an Immigration Framework.

Note: Withdrawals are permitted up until the last class for this specific course.

LAW 1519 v00 Immigration Policy across the Branches (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201519%20v00)
J.D. Seminar | 2-3 credit hours
Who can enter the United States as a visitor or an immigrant? Who will get asylum? Who will wait in a detention center? And when, according to immigration laws passed by Congress, over ten million migrants in the United States are unauthorized, who will actually be deported? American immigration law is the product of presidential policy, Congressional command, and various discretionary decisions made by executive officials including immigration judges and Border Patrol officers. This course will examine the relationships between these various decision-makers. We draw on examples from immigration policy throughout the years—from the Chinese Exclusion Act to former president Trump's travel ban—to illustrate these issues. We also use case law from the Supreme Court, the Board of Immigration Appeals, and various federal circuits to understand how courts have evaluated these issues. Finally, secondary sources from historians and legal scholars help illustrate how various players the immigration system interact in practice. We will use this information to assess critiques of the immigration system and proposals for reform. These readings also introduce students to immigration related legal concepts including asylum, mandatory detention, and the use of categorical approach to determining the significance of a migrant's criminal history. Students will develop a familiarity with immigration practice as well as a more nuanced understanding of the legal and political issues that vex immigration law scholars.

Learning Objectives:

- Develop a better understanding of the historic development of immigration law and policy.
- Become familiar with legal concepts concerning asylum, immigration detention, and executive power over admissions and removal.
- Understand different policy-making options and the tension between discretionary decision-making and compulsory enforcement.
- Appreciate the choices and limitations facing various decision-makers in the immigration context, as well as the experience of migrants and asylum seekers in the immigration system.
- Assess separation of powers concerns using examples from the immigration field.
- Make a nuanced assessment of popular news stories and debates about immigration law, paying special attention to the role of various decision-makers at play.
- Summarize and critically analyze various proposals for reform of the immigration adjudications, deportation proceedings, and the asylum process.
- Master a substantive legal issue related immigration by producing a paper and/or presentation on a legal debate in the area. Develop writing and presentation skills by participating in this exercise.
- Practice critical reading of law review articles and cases.

Recommended: Immigration Law and Policy.

Note: This course requires a paper. Students must register for the 3 credit section of this course if they wish to write a paper fulfilling the J.D. Upperclass Legal Writing Requirement. The paper requirements of the 2 credit section will not fulfill the J.D. Upperclass Legal Writing Requirement.
By the end of this course, students will be able to:

1. Identify and interpret relevant authorities and limitations that underpin Indigenous access to health care
2. Identify and understand specific regulations, guidance, and laws applicable to providing health care to US tribal governments
3. Gain knowledge on the right to self-determination
4. Master vocabulary and terminology associated with Indigenous rights and health law
5. Understand the linkage of national health systems to the United Nations including the UN Permanent Forum on Indigenous Issues; and UN Declaration on the Rights of Indigenous Peoples
6. Compare and analyze legal instruments and structures from other countries, including New Zealand, Australia, and Canada with the United States

Recommended: Administrative Law; Federal Indian Law.
The scramble to secure steady supplies of inexpensive energy to generate electricity and to power industry and transport has defined much of the twentieth and, thus far, twenty-first centuries. Climate change and renewable energy (appropriately) dominate the discussion today, particularly in the developed world, but, absent a major unforeseen technological breakthrough, non-renewable sources such as oil and natural gas are still expected to meet the majority of the world’s energy needs for decades to come (according to the US Energy Information Administration, 82% of energy consumed worldwide will still come from non-renewable sources in 2050).

The oil and gas industry lies at the intersection of global business, international law, geopolitics, the environment and particularly in the developing world, economic development. This seminar will address the international legal norms and public policy principles that have shaped, and continue to guide, this industry. It is designed for students interested in careers in energy, energy policy, project finance, international arbitration, environmental regulation or development — whether for a law firm, energy company, NGO, international organization or government — as well as students simply interested to learn more about an industry that impacts our daily lives in countless ways.

Note: FIRST CLASS ATTENDANCE IS MANDATORY. Enrolled students must be in attendance at the start of the first class session in order to remain enrolled. Waitlisted students must be in attendance at the start of the first class session in order to remain eligible to be admitted off the waitlist.

Enrolled students will have until the beginning of the second class session to request a drop by contacting the Office of the Registrar; a student who no longer wishes to remain enrolled after the second class session begins will not be permitted to drop the class but may request a withdrawal from an academic advisor in the Office of Academic Affairs. Withdrawals are permitted up until the last class for this specific course. This course is mandatory pass/fail and will not count toward the 7 credit pass/fail limit for J.D. students.

LAW 199 v03 Law and Regulation of Drugs, Biologics and Devices (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20199%20v03)
J.D. Course (cross-listed) | 3 credit hours
This course explores the legal, regulatory and policy issues that shape the research, development, and commercialization of drugs, biologics, and medical devices in the United States. We will consider the history and role of federal regulation of medical technologies; legal and ethical issues in the development and testing of new therapies; managing incentives for innovation, including patent, regulatory and data exclusivity; tort liability and its function in the regulation of the life sciences industry; and other issues. We will explore these issues using real-world examples, including the government and industry response to the COVID-19 pandemic.

Recommended: Prior or concurrent enrollment in Administrative Law.

Note: This is a required course for the Food and Drug Law Certificate.
This course is about the method of statutory interpretation generally. You will not learn the doctrine of any specific type of law in this class. You will learn the process of how to approach a piece of statutory text, how to diagnose the interpretive problem in the text, and how to answer that problem. You will practice the observant reading of text; you will get a framework for breaking down and thinking about a legal question in any statutory case; and you will practice deploying interpretive tools to answer a question in the way that best “zealously advocates” for your client. This course will prepare you for summer legal work, as well as for upper-level courses that rely extensively on statutory law (such as tax, securities, environmental law, labor law, health law, copyright law, etc.)

The course has three overall goals:

1) To provide you with an understanding of the relationships among legislatures, courts, and agencies. The course will include some basic information on how legislation and regulations get created and on the ways in which power is shared in the “making of law.”

2) To teach you the full toolkit of statutory interpretation so that you can diagnose any interpretation question and bring the right tools to bear on answering that question. This toolkit includes elements of the plain text, canons of interpretation, analysis of intent and purpose, and deference to agencies. By unpacking and analyzing these tools used by courts in various decisions, you will learn how to wield them yourself in order to reach different results.

3) To expose you to the theoretical debates around statutory interpretation. The tools that a judge chooses to use often depend on the judge’s theoretical position on statutory interpretation. Starting with materials that will frame the theoretical debate early in the semester, you will return periodically to questions about theory as you become more proficient in the toolkit.

Mutually Excluded Courses: Students may not receive credit for this course and the first-year elective course by the same name.

LAW 304 v08 Legislation (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20304%20v008)  
J.D. Course | 3 credit hours  
Lawyers spend a lot of their time analyzing — and sometimes drafting — statutes. In this class, we will focus on the actual process of how a bill becomes a law (e.g., legislative process) but also how those laws are reviewed by courts and others (e.g., statutory interpretation). Starting with legislative process, we will take a deep dive into how legislatures go about their work, including the procedural rules that govern debate, with an eye to how laws are enacted and the rules structuring legislative debate and conduct. In addition, the course will examine campaign finance and lobbying rules as well as the “due process of lawmaking.” Later in the course, we will turn to both theory and practice in statutory interpretation, including theories of interpretation generally, canons of construction, and the debate over legislative history.

I plan to interweave some of my empirical observations from a career on Capitol Hill, on campaigns, as a lobbyist, and commentator on politics and policy.

Mutually Excluded Courses: Students may not receive credit for this course and the first-year elective course by the same name.
Virtually all contemporary law involves statutes enacted by legislatures and regulatory law produced by administrative agencies. Whatever the body of law—securities, tax, anti-discrimination, telecommunications, consumer protection, intellectual property, employment, education, environmental, energy, labor, tax or criminal justice, to name a few—statutes and regulations provide much if not most of the law. Few constitutional law and federalism issues arise without a regulatory element. Facility with legislation and regulation is hence essential for any lawyer.

The course starts with exploration of why regulation is enacted, the diversity of forms of regulation, and how legislation and regulation relate to law created through the common law process. The course then breaks into three basic units, all of which examine legislation and regulation primarily (but not exclusively) through federal law. The first unit examines congressional process, reasons interpretive challenges arise, and the diversity of interpretive methods and strategies wielded in disputes over statutory meaning. The second unit turns to the pervasive role administrative agencies play in interpreting, implementing and enforcing statutes. This includes coverage of their procedural options, judicial review of agency process, reasoning, and responsiveness, as well as discussion of the role of cost-benefit analysis and White House review in the regulatory process. The last unit links the first two, examining statutory interpretation in the administrative state. The course closes with analysis of regulatory innovations, possible coverage of recent major regulatory developments, and review problems.

The class will use the Manning and Stephenson casebook, Legislation and Regulation (3rd edition) (2017) and supplemental materials. Class method will involve a mix of lecture, questions and answers (via volunteers, questions I'll direct at particular students, and questions students raise), and problem-based analysis.

Mutually Excluded Courses: Students may not receive credit for both this course and Administrative Law with Professor Heinzerling (LAWJ-1349). Students may take other sections of Administrative Law in the upperclass curriculum.

Note: This course is a first-year elective. First-year day students select an elective offered in the spring.
**LAW 410 v04 Local Government Law** ([http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20410%20v04](http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20410%20v04))  
J.D. Course | 3 credit hours  
This course surveys the legal environment, political values and policy debates that shape local government in the United States. After completing the course, students will be able to identify many of the key doctrinal principals, and analyze how they apply to the socio-economic context of federalism today. Some of the topics for discussion include: (1) the forms and powers of the various types of local governments (e.g. cities, counties, and special districts); (2) the allocation of power between states and their local governments and the role of local governments in the federal system; (3) the pivotal role of local government in the regulation of private land use; (4) local sources of revenue and limits on borrowing; (5) recent trends in blight, suburbanization, sprawl and redevelopment; and (6) inter-local cooperation and regional governments. The course will also challenge students to explore the tension between the historical movement toward greater local home rule and the modern favor for “smarter growth” and regional solutions. Finally, the course will enable students to exercise and develop skills of particular relevance to local decision-making: statutory interpretation, working effectively in groups, and understanding the dynamics and procedural context of local government proceedings.

**Learning Objectives:**

This course aspires to empower its students to:

- Recognize and apply several core legal doctrines that enable and constrain the existence of various local government entities.
- Describe how several prominent strains of American political theory have guided the historical development of local government law.
- Apply several constitutional principles and legal standards that regulate local government functions – for example, local taxation and expenditures, land use regulation, education, public safety and the other local services.
- Understand the menagerie local entities and appreciate how alternative forms of governance impact a lawyer's ethical obligations.
- Explain the predominant funding mechanisms for local government, and analyze how state and local policies can affect the viability of local government.
- Identify several state and federal policies that can impair the sustainability of local government.
- Develop and deliver principled arguments about how socio-economic policy issues relate to legal doctrine, intra-regional wealth, sprawl and alternatives to local government.

**Note:** Although no prerequisites are required for this course, Professor Gardner strives to highlight connections between the material discussed in class and other substantive legal topics. Third- and fourth-year students will be encouraged to share learning from related courses – for example, civil procedure, constitutional law, administrative law, land use law and other legal subjects. In particular, this course will offer a meaningful segue leading to (and from) courses in land use and administrative law.

---

**LAW 324 v00 Maritime Law** ([http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20324%20v00](http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20324%20v00))  
J.D. Course (cross-listed) | 2 credit hours  
This course surveys various principles and aspects of admiralty and maritime law of the United States, including: the historical and constitutional bases for its existence; the admiralty and maritime jurisdiction of the courts; the substantive law of maritime contracts and maritime torts; the application of criminal law at sea; the laws governing carriage of goods and passengers by sea; the public order of the oceans at the national and international levels; protection of the marine environment; and federal-state maritime issues. Consideration is given not only to the current state of the law in these areas, but also to related U.S. government policies and international and comparative law issues.

---

**LAW 3053 v00 Money Managers as Fiduciaries** ([http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%203053%20v00](http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%203053%20v00))  
LL.M Course (cross-listed) | 2 credit hours  
Money Managers -- investment advisers, broker-dealers and the like -- serve an important role not only in the financial system of the United States, but also the financial operations of institutions and the financial lives of individuals. Those managers today advise institutional and individual clients (including mutual funds) having aggregate assets under management well in excess of $70 trillion globally. This course focuses on the essential legal obligations placed on money managers in providing services to their clients and prospective clients: complying with a broad variety of fiduciary duties; meeting the terms and conditions of rules adopted by regulatory agencies; and avoiding engaging in fraudulent activities.

The course begins with consideration of the concept of a fiduciary and the manner in which the concept has become imbedded in the federal securities laws applicable to money managers. The course then turns its attention to the concept of fraud as defined in, and interpreted under, those securities laws and how the concept has been employed and expanded by the Securities and Exchange Commission (“SEC”) to set standards for money managers registered under the Investment Advisers Act of 1940 (the “Advisers Act”), the Investment Company Act of 1940 (the “1940 Act”) and portions of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”) will be the principal statutory provisions around which the course will be centered. A number of classes during the semester will be devoted to detailed study of rules adopted by the SEC under the Advisers Act and the 1940 Act and by the Department of Labor under ERISA. At least three class sessions during the semester will be practical in nature, designed to enable students to assume the roles of legal practitioners advising money management firms facing various factual situations involving clients of those firms.

**Note:** First class attendance is strongly encouraged for all enrolled and waitlisted students.
**LAW 508 v02 Policy Clinic (Harrison Institute for Public Law)** (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW\%20508\%20v02)

J.D. Clinic | 8 or 14 credit hours

Students in the Policy Clinic provide services to make democracy work several policy themes. Recent projects include:

- **Community equity** – Combat gentrification and displacement in low-income communities of color; develop a community support fund, develop a community resilience hub.
- **Health and food** – Organize a consortium to improve working conditions in university food supply chains, expand access to oral health services, reinvent a better food chain for institutions (universities, hospitals, schools, and shelters), analyze social determinants of health (housing, food security, etc.) for state health officials.
- **Labor and human rights** – Organize a consortium to improve working conditions in university food supply chains (same as health above), protect worker rights in global supply chains for the FIFA World Cup and other mega-sporting events.
- **Trade and climate** – Develop mutually supporting climate and trade policies, develop options for international cooperation on climate policies through “climate clubs,” recommend strategies to decarbonize steel production without violating WTO rules, and identify strategies for reducing greenhouse gas emissions while preserving manufacturing jobs.

Please see the Policy Clinic website (https://www.law.georgetown.edu/experiential-learning/clinics/the-policy-clinic-climate-health-food-human-rights-and-trade-harrison-institute) for more detailed information about the program.

For registration-specific supplemental materials, please see the Policy Clinic PDF (https://georgetown.app.box.com/s/dsfc6dup44kjfwx6pmuyinjw7f9zq04).

For information about clinic registration generally, please see the Clinic Registration Handbook (https://georgetown.box.com/s/y9f8wg3jyqycuneipv3ytjlf6ajyppyv).

Learning outcomes for this clinic: Students are supervised, evaluated and graded on three skill sets, each of which has specific evaluation criteria in the Policy Clinic Operations Guide. (https://www.law.georgetown.edu/wp-content/uploads/2022/04/2021-22-Policy-clinic-operations-8-12-21-v3.docx)

1. **Management and professionalism** – includes “managing up” with supervision meetings, initiating self-evaluation, managing effort and deadlines, collaborating, and expectations in a professional culture.
2. **Analysis and strategy** – covers legal, policy and strategic analysis. It includes identifying issues that require analysis, learning the context efficiently, using diverse sources to avoid bias, explaining analytic methods, using a logical framework, and drawing conclusions that meet client needs.
3. **Communication, writing and speaking** – includes organizing documents and presentations, meeting audience needs for context and decision-making, relating analysis through stories and examples, presenting visual information, and editing for plain language, clarity, and English style.

**Recommended:** Legislation and Administrative Law. Also, for climate projects: Local Government Law; and for trade or human rights projects: International Law I, International Trade (various titles), World Trade Organization: Law, Policy and Dispute Settlement, and International Human Rights.

**Mutually Excluded Courses:** Students may not concurrently enroll in this program or in an externship or a practicum course.

---

**LAW 408 v03 Poverty Law and Policy** (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW\%20408\%20v03)

J.D. Practicum | 8-10 credit hours

In fieldwork practicum courses, students participate in weekly seminars and conduct related fieldwork at outside organizations. This fieldwork practicum course is designed for students who wish to work for a public interest law organization that deals with issues connected to poverty. Students will participate in a two-hour/week seminar (in both the fall and spring semesters) that focuses on the framework, history, and current issues related to American poverty. Students will also work for a public interest law organization that works on issues connected to poverty; students may work for either 10 or 15 hours/week in both the fall and spring or 30 hours/week in one semester only. In addition, students may work for 10 hours/week in the fall and 15 hours/week in the spring or vice versa.

**SEMINAR:** Classes in the fall will cover the definition of poverty, the history of antipoverty policy, welfare, work supports, and safety net issues. Spring classes will feature guest lecturers covering education, health, housing, homelessness, juvenile justice, and child welfare. Students will be involved in participatory exercises in the course of both semesters: in the fall, mock press conferences, testimony to Congress, and meetings with public officials; and in the spring, a group project on developing a plan for neighborhood transformation, using materials studied through the year. A final paper will be required. Students will earn four graded credits for the seminar (two credits each semester); one grade will be provided at the end of the year.

**FIELDWORK:** In the four, five, or six-credit, mandatory pass-fail, fieldwork portion of the practicum, students will work with a public interest law organization that deals with issues connected to poverty. Students may work for either 10 or 15 hours in both the fall and spring. 10 hours in the fall and 15 hours in the spring or vice versa, or 30 hours/week in one semester only. The host organization may work from either a national or a local perspective on issues connected to poverty. Placements might involve a focus on poverty per se or “poverty and...” e.g., civil rights, women, education, housing, health, juvenile and criminal justice, child welfare or immigration. Depending on the organization, activities at placements could include litigation and/or policy advocacy, including governments on all level and in either the executive branch or the legislative. Students may propose and arrange their own placements; these must be approved by Professor Edelman. Alternatively, Professor Edelman is available to assist in finding and setting up the placements. Depending on the number of hours worked, students will earn four, five, or six pass/fail credits for the fieldwork; one grade will be provided at the end of the year.

**Prerequisite:** J.D. students must complete the required first-year program prior to enrolling in this course (part-time and interdivisional transfer students may enroll prior to completing Criminal Justice, Property, or their first-year elective).

**Mutually Excluded Courses:** Students may not concurrently enroll in this practicum and an externship or another practicum course. If students complete their fieldwork hours for this practicum entirely in one semester, they may be eligible to enroll in a clinic for the other semester.

**Note:** This course is open to J.D. students only.

This course may be suitable for evening students who can attend seminar and participate in fieldwork during business hours. Students who enroll in this course will be automatically enrolled in both the seminar and fieldwork components and may not take either component separately. A student wishing to withdraw from the course will be withdrawn from both the seminar and fieldwork components. Default attendance rule for all practicum courses (unless the professor changed it) is that if a student is not on the attendance list for the semester attended, the student will receive a grade of “WI,” which will not count toward the student’s grade point average.
LAW 1803 v00 Practitioner’s Perspective on Banking Structure and Regulation [http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201803%20v00]  
J.D. Course (cross-listed) | 2 credit hours  
A real world, practitioner’s perspective is critical to understanding the complexities of practice as a banking lawyer. The law governing the regulation and supervision of banks and their affiliates is constantly developing and is one of the most intricate and interesting areas of U.S. law. This two-hour lecture and discussion course is designed to provide students with the tools to develop a career in banking law and will explore a broad range of topics of interest to lawyers practicing banking law.

Key topics include an introduction to the U.S. regulatory agencies involved in the supervision and regulation of banks, the powers and activities of banks and their affiliates, the important role of Federal deposit insurance, and the special procedures for resolving a failed bank. In addition, the course will cover the special manner in which anti-trust laws apply to mergers and acquisitions involving banks and their affiliates, and review the process for chartering new financial institutions, such as fintechs and minority-owned depository institutions.

The course will emphasize the the unique regulatory framework applied to banks and the importance of racial equity in our financial system, including a focus on the Community Reinvestment Act and the policy response to address historic inequities in financial services. The course will also explore a variety of hot topics in banking, such as digital currency, the rise of fintech companies, and the growing importance of environmental, social, and governance and other cutting-edge issues.

Recommended: Administrative Law; Corporations.

Note: This course will have a mid-term take-home exam.

LAW 1548 v00 Race and Democracy: Voting Rights in America [http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201548%20v00]  
J.D. Course (cross-listed) | 3 credit hours  
Race and Democracy: Voting Rights in America assesses the impact of white supremacy ideology on American Democracy. The course uses the struggle for Black voting rights as the primary framework for exploring this relationship.

Over the course of the term, students 1) develop a working knowledge of how race and inequality impact voter registration, participation and/or representation 2) acquire critical tools to identify and analyze dominant ideologies and narratives reinforcing inequalities and 3) explore innovative public policy and civil society solutions to the inequalities plaguing voting rights and electoral politics in American democracy.

Learning Objectives and Methods: Over the course of the semester, students 1) develop a working knowledge of how race and inequality impact voter registration, participation and/or representation 2) acquire critical tools to identify and analyze dominant ideologies and narratives reinforcing inequalities and 3) explore innovative public policy and civil society solutions to the inequalities plaguing voting rights and electoral politics in American democracy.

LAW 1607 v00 Race, Inequality and Progressive Politics: Voting Rights in America [http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201607%20v00]  
J.D. Course (cross-listed) | 3 credit hours  
Race, Inequality and Progressive Politics: Voting Rights in America explores 1) the role of race and inequality in the evolving progressive vision of American democracy 2) lessons learned from successive backlashes to the progressive vision and 3) the implications of this history for the future of progressive politics in America. Tracking the historical evolution of progressive politics from 19th century Reconstruction to 20th century Civil Rights, this course locates the defining characteristics of American Progressive thought in an Ideology of Equality that consists of the following: 1) a critique of entrenched economic, political and social inequality 2) the reconstruction of government’s role in remedying inequality and 3) the development of a community-based, participatory democracy – a robust civil society supplementing the work of progressive government.

Recommended: There are no prerequisite requirements for this course, although courses in constitutional law can be helpful.

Note: NOTE FOR THE SUMMER 2021 SECTION: The professor will teach this course virtually via Zoom. Students may choose to participate from the classroom or via Zoom while the professor is participating remotely. Students who want to participate in person must be in the University’s COVID testing protocol [https://www.law.georgetown.edu/covid-19-updates/message-from-the-dean-covid-health-protocols-enforcement-and-discipline] and follow all other safety measures.

Students may not withdraw from this class after the add/drop period ends without the permission of the professor.
LAW 960 v00 SEC Enforcement Process (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20960%20v00)
LL.M Course (cross-listed) | 2 credit hours
This course examines all aspects of the SEC's enforcement process, from the opening of an investigation through its resolution, whether by settlement, litigation, or closure without enforcement action. We consider strategic considerations from both the SEC's and defense practitioner's perspective at every critical juncture of an investigation, including whether to self-report and cooperate, whether to assert and how to protect privileges, and how to engage with the SEC before, during, and after the Wells process. We also discuss the overlapping roles of federal and state criminal and civil regulatory authorities. We examine internal investigations, whistleblowers, the ethical obligations of counsel, and review the SEC's current areas of enforcement focus—insider trading, financial fraud, investment advisors, gatekeepers, Ponzi and pyramid schemes, and the Foreign Corrupt Practices Act. We survey the various contexts in which claims under the securities laws may be pursued, including litigation with the SEC and other regulators and class and derivative actions. We use important historical precedents as well as current SEC enforcement developments as the basis for class discussion.

Strongly Recommended: Previous or concurrent registration in Securities Regulation is strongly recommended.

LAW 760 v01 SEC Regulation of Financial Institutions and the Securities Markets (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20760%20v01)
LL.M Course (cross-listed) | 2 credit hours
The securities markets have faced some of the most significant challenges since the creation of the Securities and Exchange Commission; including the recent credit crisis, the implosion of subprime mortgages, the collapse of several of the largest brokerage houses, the failure of auctions for auction-rate securities, the liquidity crisis in asset-backed securities, and the alleged $50 billion Ponzi scheme by Bernard Madoff. These events have altered the landscape of 21st-century Wall Street. This course will cover the operation and regulation of the securities markets, brokerage firms, and other financial institutions. We will study specialized SEC and self-regulatory organization rules that regulate the activities of financial firms in connection with the distribution and trading of securities as well as Exchange Act anti-fraud concepts. We will explore the increasingly complex questions raised as world markets continue to converge, examine recent trends and proposed regulation in this area, consider the appropriate bounds of U.S. regulation when foreign markets, financial institutions, and investors interact, and discuss the securities activities of banks and other financial institutions into the securities business. We will look at each of these issues in the context of the current financial crisis, the collapse of Bear Stearns, the bankruptcy of Lehman Brothers, and the sale of Merrill Lynch.

Recommended: Securities Regulation.

Note: DISTANCE STUDENTS REGISTER FOR CRN#: 35218. This course is open to both on campus and distance students. However, only students enrolled in the Executive LL.M. in Taxation, the Executive LL.M. in Securities & Financial Regulation, and the MSL programs may take this course on a distance basis. All J.D. students and resident LL.M. students may not enroll in this course on a distance basis.

LAW 406 v00 Space Law Seminar (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20406%20v00)
J.D. Seminar (cross-listed) | 3 credit hours
This seminar addresses the international and domestic laws governing outer space. Class discussion will include issues such as: liability for damage caused by space objects, use of outer space resources, rescue of astronauts and return of objects launched into outer space, environmental issues in outer space, and other more specific topics such as NASA and the International Space Station, commercial space operations, U.S. Government agencies involved in outer space, and the role of the United Nations in outer space.

Strongly Recommended: International Law I.

Note: Students may not withdraw from this class after the add/drop period without the permission of the professor.

LAW 406 v01 Space Law Seminar (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20406%20v01)
LL.M Seminar (cross-listed) | 2 credit hours
This course will provide an overview of U.S. domestic and international law applicable to spaceflight activities. The focus will be on domestic licensing procedures and international treaty interpretation for launches, reentries, and other spaceflight activities.

Recommended: Prior or concurrent enrollment in International Law I.
This course will give students an in-depth look at rapidly developing areas in immigration law. Students will become familiar with the variety of adjudicators in the immigration system, navigating the relationship between Asylum Officers, Immigration Judges, the Board of Immigration Appeals, and the federal courts. We explore legal topics that often arise before these adjudicatory bodies, focusing on those that generate the most frequent—and complex—litigation. Specifically, we focus on detention and bond, corroboration requirements for asylum seekers, and "categorical approach," under which adjudicators determine whether a criminal conviction renders a respondent removable and ineligible for relief. Students will also become familiar with constitutional challenges to immigration statutes or procedures as they appear in immigration courts and the extent of executive authority under the immigration laws. Finally, we introduce students to judicial review under the Immigration & Nationality Act, the immigration rule of lenity, and the role of deference doctrines in immigration cases.

This course also provides experiential training in the field of appellate immigration practice. Instead of writing a final paper or exam, students will participate in a moot court exercise. Each student will draft the pleadings and prepare arguments for an immigration-related case currently pending in a court of appeals. During this process, the professors provide each student with individualized feedback on her brief-writing and oral advocacy.

**Learning Objectives:**

Through this course, students will:

- Better understand judicial review under the immigration laws and the immigration adjudication procedures.
- Develop familiarity with asylum law, exclusion and removal grounds, and detention under the immigration laws.
- Gain knowledge of administrative legal practice, including concepts like administrative exhaustion requirements, administrative appeals procedures, and judicial review.
- Become familiar with appellate practice, including concepts like standard of review and findings of fact.
- Develop oral advocacy skills, including the ability to respond to present a legal argument and respond to questions from appeals judges.
- Prepare pleadings in an immigration case at the appellate level, including researching relevant caselaw and succinctly stating the facts of the case.

**Recommended:** Immigration Law and Policy.
LAW 435 v01 State Government Law and Policy (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%20435%20v01)

J.D. Seminar | 2 credit hours
"There will always be a new federalism" one scholar said. In recent years, the federal government has taken on increasing responsibility for state programs that traditionally have been within the purview of state government, including health, education, and job creation. The states have not accepted this diminished role, and in state legislatures and federal courts across the nation, a battle is being played out over the constitutional limits of federal power. This course will examine the balance of powers between the three branches of state government and the intergovernmental relationship between state and federal levels. We will start with an examination of Tenth Amendment, Commerce Clause, and coercive federalism jurisprudence, focusing in particular on National Federation of Independent Business v. Sibelius (the Affordable Care Act case). We will also look at state constitutions and the role of state courts of final jurisdiction in the protection of individual rights and the roles of these courts as a counterpoise to federal courts, the role of the governor, the relationship of state governors to their legislatures, judicial independence in states that elect their judges, and states as lobbyists of the federal government. We will consider the choice advocates make between litigating or pursuing state legislative change to advance policy objectives. There will be two assessments, both involving role-playing, which will require student papers as well as one-on-one evaluation of oral presentations. For these, students will be expected to work on contemporary issues simulating the work of state legislative committee staff, Governor’s counsel staff, and state-level lobbyists. Participation will be a component of assessment for the class. Limited to 20.

Note: Students may not withdraw from this class after the add/drop period ends without the permission of the professor.

LAW 1524 v00 Statutory Interpretation (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201524%20v00)

J.D. Course | 3 credit hours
This three-credit course, taught by a U.S. District Judge (and 1990 Georgetown University Law Center alumnus), provides instruction and in-class exercises in statutory interpretation, with emphasis in three areas:

1. practice (how it is done by courts, and by lawyers who advocate in court and before administrative agencies);
2. theory (how those practices are explained, both descriptively and normatively); and
3. doctrine (the textual and substantive canons of statutory construction).

Offered for several years at Boston area law schools by the judge, the course is designed to be both intellectually engaging and highly practical.

While much of the first year law school curriculum focuses on "common law reasoning" (identifying applicable judicial precedent and, if necessary, distinguishing the case at hand), most of modern law practice involves applying statutory law produced by the Congress and state legislatures, as well as administrative law in the form of rules and regulations. "Thinking like a lawyer" involves mastering the practices and doctrines of statutory interpretation.

This course covers those practices, the doctrines that govern them, and the theories that (purportedly) explain or justify them: purposivism, intentionalism, textualism, and pragmatism in its various forms. You'll learn some substantive law, but the class won't focus on it. Instead you'll encounter text, figure out the interpretive problems the text presents, and learn how courts, advocates and academics have approached those problems.

Learning Objectives:

The course has three overall goals:

1. Enabling you to recognize the "moves" undertaken by courts and advocates in interpreting statutes and regulations, and to make and oppose the arguments underlying those moves.
2. Mastering a reasonable number of canons of statutory construction (both textual and substantive), as well as other related tools such as "ordinary" and "plain" meaning, legislative intent, statutory purpose, and deference to administrative agencies.
3. Exposing you to the theoretical debates that inform and animate statutory interpretation. A judge's theoretical understanding of statutory interpretation may affect the judge's decision making and opinion writing (which are two different things) in statutory cases. This may help you form your own theoretical position on statutory interpretation, which may in turn inform your view of the origin, nature and functions of law.

Recommended: Administrative Law; Constitutional Law I: The Federal System.

Mutually Excluded Courses: Students may not receive credit for both this course and Legislation, or Lawmaking: Introduction to Statutory and Regulatory Interpretation, or The Regulatory State.

Note: NOTE FOR THE SUMMER 2021 SECTION: The professor will teach this course virtually via Zoom. Students may choose to participate from the classroom or via Zoom while the professor is participating remotely. Students who want to participate in person must be in the University's COVID testing protocol (https://www.law.georgetown.edu/covid-19-updates/message-from-the-dean-covid-health-protocols-enforcement-and-discipline) and follow all other safety measures.
LAW 1784 v00 Statutory Interpretation (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW %201784%20v00)
J.D. Course | 3 credit hours
description forthcoming.

Note: This course is a first-year elective. First-year day students select an elective offered in the spring.

LAW 1782 v00 Statutory Interpretation Theory Seminar (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW %201782%20v00)
J.D. Seminar (cross-listed) | 2-3 credit hours
This seminar will introduce students to the deeper theoretical questions and debates surrounding statutory interpretation. How should courts analyze statutory text? What interpretive tools should judges use to determine statutory meaning? Should those tools change when the text is vague or ambiguous? What role, if any, should legislative process materials or realities play in the interpretation of statutes? What is textualism and how has it changed over time? What are the most salient interpretive trends on the modern Supreme Court?

Students taking the two-unit version of the class will be graded on seven short reaction papers. Students taking the three-credit version must provide three reaction papers and satisfy the Law Center's writing requirement. Given the theoretical nature of the topic, law review students are especially encouraged.

Learning Objectives: By the end of the semester, students in the course should understand and be able to evaluate the advantages and disadvantages of different interpretive methodologies and tools, such as corpus linguistics, legislative history, semantic canons, etc. They should also be able to describe and critique the U.S. Supreme Court's current interpretive methodology. Last, students should have a strong understanding of how to use the different interpretive tools and canons to argue in favor of or against a particular statutory reading.

Strongly Recommended: A basic introductory course in Legislation is highly recommended, but not required.

Note: This seminar requires a paper. J.D. students must register for the 3 credit section of the seminar if they wish to write a paper fulfilling the Upperclass Legal Writing Requirement. The paper requirements of the 2 credit section will not fulfill the J.D. Upperclass Legal Writing Requirement.

LAW 1625 v00 Technology Policy and Practice (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW %201625%20v00)
J.D. Seminar | 2 credit hours
Discover what it means to "practice" technology policy through an innovative and experiential class using cutting-edge technology issues to teach practical writing, legal, legislative and policy making skills that can be applied to any legal and policy matter (e.g., competition, national security, health, tax policy).

Students can expect to leave with an understanding of key technology legal and policy issues and having acquired "skills of the trade" for legislative advocacy, including: persuasive advocacy for policy issues, formation of policy campaigns, legislative strategic planning, drafting of policy documents, and stakeholder politics. Specifically, students will develop practical legal and policy making skills, such as drafting talking points, creating a strategic legislative campaign, and learning the art of an elevator pitch. Students will learn skills that can help them pursue a wide-array of careers, from a law firm to the White House.

There is no prerequisite course required. Each class will incorporate pre-class preparations and an in-class skill building exercise.

Learning Objectives:

Goals:
- Receive substantive knowledge of legal issues related to technology
- Develop skills for successful legislative advocacy and policy making with a focus on stakeholder perspectives and tech policy issues
- Develop legislative strategy skills needed for planning and implementing legislative advocacy/policy campaigns
- Develop oral and written skills specific to policy making

Outcomes:
- Students will gain substantive knowledge of technology policy issues.
- Students will develop practical written advocacy skills through drafting advocacy papers, talking points and testimony to Congress.
- Students will develop practical written advocacy skills for drafting testimony from the perspective of a Congressperson or policy maker.
- Students will develop legislative strategy skills - such as how to coalition build, critically review a lobbying strategy plan, evaluate a media plan and other crucial aspects of policy campaign.
- Students will develop oral advocacy skills for delivering prepared testimony to Congress.
- Students will develop oral advocacy skills for delivering an elevator pitch.
- Students will develop oral advocacy skills for preparing and implementing an effective meeting for policy making.

Mutually Excluded Courses: Students may not receive credit for both this course and Federal Advocacy in Technology Law and Policy.
**LAW 1099 v00 The Art of Regulatory War Seminar**

J.D. Seminar (cross-listed) | 2-3 credit hours

This seminar will focus on "the art of regulatory war." How can and do lawyers and other private and governmental actors and stakeholders working at the regulatory intersection of law and politics gain advantage, use their different sorts of legal artillery and strength, and push regulatory disputes and tool choices into venues, modes, and postures that favor their or their clients’ interests and broader policy goals? What changes are underway regarding the nature of regulation, attitudes about the role of the administrative state, and ways regulatory wars are fought?

Subject to adjustment in light of legal developments and student interest, the seminar meetings will be organized around a mix of case studies and cross-cutting regulatory topics. Topic-based classes will likely select from among the following: critiques of assumptions of regulatory overreach and empire building; debate over the values and functions of preemption, and rationales for various federalism-utilizing allocations of authority; theories of regulation and regulatory reform proposals; recent presidential and agency deregulatory and policy change efforts and judicial and scholarly responses; debates and shifting doctrine regarding deference regimes; the shift to market-based and experimental "rolling rule" modes of regulation; "sound science" and "bought science;" behavioral economics and regulatory design; and "impact" litigation strategies. Case study subjects will likely include a mix of the following: my own research into the 1971-85 battles over the multi-billion dollar Westway project defeated by a small number of citizens; climate change regulatory and legislative proposals and battles; battles over COVID vaccine mandates and what they reveal about the future of the administrative state and judicial review of agency judgments; and court, regulatory and legislative battles over protecting "waters of the United States" under the Clean Water Act. Readings will include diverse materials to illuminate the art of regulatory war, including court decisions, briefs, congressional testimony, regulatory materials, statutory provisions, and scholarship. Students will before each class submit a few brief comments or questions about the readings, with class discussion building on those areas of interest. Students will have broad latitude to develop related paper topics of interest to them as long as they are original work for the seminar and have a link to constitutional, statutory, regulatory, regulatory design, or administrative law issues. During the last few weeks of the semester, we will conclude with students sharing and leading discussion of their draft papers. There are no seminar prerequisites, but students interested in administrative law, constitutional law, economic and risk regulation, environmental law, energy law, legislation, law and politics, law and economics, litigation and other areas of public law should find the material of interest.

**Note:** FIRST CLASS ATTENDANCE IS MANDATORY. Enrolled students must be in attendance at the start of the first class session in order to remain enrolled. Waitlisted students must be in attendance at the start of the first class session in order to remain eligible to be admitted off the waitlist.

This seminar requires a paper. J.D. students must register for the 3 credit section of the seminar if they wish to write a paper fulfilling the Upperclass Legal Writing Requirement. The paper requirements of the 2 credit section will not fulfill the J.D. Upperclass Legal Writing Requirement.

**LAW 3134 v00 The Intersection of Employment and National Security Law**

LL.M Course (cross-listed) | 1 credit hour

Federal employees and contractors safeguard our nation’s most sensitive information and secrets. However, many do not consider that national security is a major consideration when employing civil servants or making decisions regarding their continued employment. As of 2017, over 4.3 million Americans possess a security clearance and even more have access to sensitive, unclassified information. Security clearances and suitability reviews assess the reliability, trustworthiness, and character of prospective employees.

Because security clearance and suitability adjudications often determine whether a person is hired - and in some cases, fired - they invoke the application of employment protections under laws such as Title VII of the Civil Rights Act of 1964, Age Discrimination in Employment Act of 1967, and the Americans with Disabilities Act Amendments Act of 2008. The decision to deny employment based on a security clearance or suitability decision is considered an adverse action. While some actions are subject to judicial and/or administrative court review, others are not. Therefore, executive orders, federal regulations, and agency guidance are necessary to ensure that vetting is both thorough and fair. In the last decade, courts and agencies have grappled with issues ranging from discrimination to the stigmatization of mental health issues in security clearance and suitability adjudications.

This course will examine the intersectionality of national security issues and employment; specifically, how national security concerns shape vetting in federal employment from security clearances to suitability reviews. Moreover, it will serve as an introduction to understanding the interplay of federal case law, executive orders, federal regulations, and agency guidance in this area.

**LAW 1526 v00 The Law of Autonomous Vehicles**

J.D. Seminar (cross-listed) | 2 credit hours

Autonomous vehicles are roiling industries as diverse as retail, food delivery, trucking, and personal transportation. Although there is a rising consensus that autonomous, networked cars could save tens of thousands of lives, there is a similar consensus that they also will create tens of thousands of accidents that human drivers would not. Although the technology for autonomous vehicles is already on the roads, the law, ethics, and policy governing these machines is late evolving. This course will examine alternatives for regulating autonomous vehicles, including topics such as which parties should bear responsibility for the actions of autonomous vehicles, how theories of responsibility will change over time, as well as the appropriate modes and agencies of regulation. Paper required.

**Recommended:** Property (or Property in Time), Torts (or Bargain, Exchange and Liability), and Criminal Law.
LAW 1019 v00 The Law of Public Utilities: Bringing Competition to Historically Monopolistic Industries

Our major infrastructural industries—electricity, gas, telecommunications, transportation and water—were historically controlled by monopolies. Since the 1980s, efforts to introduce competition into these industries have met obstacles. Battles before legislative bodies, regulatory agencies and courts, at the state and federal levels, have produced a distinct body of law. That body of law—the law of introducing competition into historically monopolistic industries—is the subject of this course.

Regardless of the industry or era, the regulation of infrastructural monopolies and their competitors has five common elements: its mission (to align business performance with the public interest); its legal principles (ranging from the state law on exclusive monopoly franchise to federal constitutional protection of shareholder investment); policy flexibility (accommodating multiple public purposes, from service reliability to environmental accountability to protection of vulnerable citizens); reliance on multiple professional disciplines (law, economics, finance, accounting, management, engineering and politics); and formal administrative procedures, such as adjudication and rulemaking.

Today, political challenges are causing policymakers to stretch regulation’s core legal principles. Four examples of these challenges are: climate change (e.g., To what extent should we make utilities and their customers responsible for “greening” energy production and consumption?); universal service (e.g., Should we bring broadband to every home, and at whose cost?); privacy (How do regulators induce personal changes in energy consumption while protecting the related data from public exposure?); and protection of our infrastructure from hackers, terrorists and natural catastrophes.

Complicating these political challenges are two sources of constant tension: ideology (e.g., private vs. public ownership, government intervention vs. “free market”); and state-federal relations (e.g., Which aspects of utility service are “national,” requiring uniformity; and which are “local,” warranting state experimentation?).

This field has many jobs, as new issues emerge and as baby boomers retire. Lawyers play varied roles. They advise clients who are suppliers or customers of regulated services, represent parties before regulatory tribunals, advise those tribunals or their legislative overseers, and challenge or defend those tribunals on judicial review.

Note: The 3-credit Writing Requirement section of this course is restricted to J.D. students only. The 2-credit Paper section of this course is restricted to LL.M. students only.

LAW 1768 v00 The Temporal Dimensions of Governmental Powers Seminar

This course will study the respective temporal reaches of, and restrictions on, the legislative, judicial, and executive powers of American governments.

It is almost universally now thought that “retrospective laws are . . . generally unjust . . . and . . . neither accord with sound legislation nor with the fundamental principles of the social compact.” Joseph Story, Commentaries on the Constitution, §1398 (3d ed. 1858). But legislatures nonetheless do sometimes enact retroactive laws, and sometimes for quite benign and legitimate reasons. Furthermore, judicial and executive adjudicatory actions have retroactive effects; and, as with retroactive legislation, some of those adjudicatory actions may establish the legal basis for retroactive restrictions on conduct about which the regulated persons did not have prior notice — such as when the adjudicators construct manifestly new, yet binding, interpretations of ambiguous laws (i.e., when they “make” or “declare” law that will serve as “precedent”). Concomitantly, although often thought of as necessarily being retroactive, judicial and executive adjudicatory powers are sometimes exercised with only future effects — such as when courts or agencies have declined to apply their new interpretations of law retroactively, or have awarded relief that has only prospective effects (e.g., an injunction, a writ of mandamus, a declaratory judgment).

This course will explore these temporal issues. We will examine what legally differentiates “prospective” from “retroactive” governmental actions. We will study the presumption that legislation looks forward, not backward, as well as several of the constitutional constraints on retroactive legislative actions. From there, we will explore both the content of and rationale for the contrasting presumption that judicial action is retroactive in perspective and effect; and we will study the controversy about whether and when a judicial decision announcing a new principle of law — such as a judicial decision overruling an interpretation of law announced in a prior decision — may properly be applied only to conduct or events occurring after the date of that judicial decision. Finally, we will examine whether and how temporal limitations apply in the context of the exercise of executive powers (state and federal) and, concomitantly, how the discretion of the executive and its agents is often temporally insulated — through limits on the writ powers, the doctrine of qualified immunity, etc. — when there is not yet “clearly established” law on an issue.

Our goal is to better understand how the temporal reaches of, and limitations on, the separate powers of government inform the Rule of Law and American constitutional democracy. Such an understanding is relevant and important not only to those who want to study the operation of government and the constitutional limitations on government, but also to those who on behalf of clients — private, public interest, or governmental — seek to influence the temporal application or imposition of new legal restraints.

Prerequisite: Constitutional Law I: The Federal System and Administrative Law.

Note: This seminar requires a paper. J.D. students must register for the 3 credit section of the seminar if they wish to write a paper fulfilling the Upperclass Legal Writing Requirement. The paper requirements of the 2 credit section will not fulfill the J.D. Upperclass Legal Writing Requirement.
LAW 1600 v00 Toxic Chemical Law and Advocacy (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201600%20v00) (Fieldwork Practicum)
J.D. Practicum | 4 credit hours
In a fieldwork practicum course, students participate in a weekly seminar and conduct related fieldwork at an outside organization focused on toxic chemical law. For example, have you ever wondered what is in the food and drink we consume besides the raw agricultural products such as coffee beans or milk? In this course, students will explore the how the Food and Drug Administration (FDA) under the Food, Drug, and Cosmetic Act, by the Environmental Protection Agency (EPA) under the Toxic Substances Control Act and other statutes, and the the Consumer Product Safety Commission (CPSC) under the Consumer Product Safety Act work together (or don't) to regulate toxic chemical products in consumer products that are consumed or used in the U.S. every day such as coffee, soft drinks and yogurt. Students will develop real-world lawyering skills such as fact gathering, legal research, drafting, developing guidance or advice, crafting advocacy strategy and more. Students will participate in a two hour/week seminar and also undertake 10 hours/week of fieldwork at the Environmental Working Group (EWG), a public-interest nonprofit that advocates on behalf of consumers, and other non-governmental organizations.

SEMINAR: The authority of the FDA, EPA and CPSC to regulate the safety of toxic chemicals in consumer products has evolved as the manufacturing of everyday products has become increasingly industrialized and affected by an array of new technologies that cause the food and drink we regularly consume to contain potentially harmful chemicals. This seminar will utilize legislative and administrative materials as well as case law to enable students to critically evaluate the processes by which the federal government regulates toxic chemicals in consumer products and compare and contrast regulatory schemes for different consumer products. The course will also touch on related topics such as the role of the Federal Trade Commission in the regulation of marketing trade practices related to chemicals in consumer products.

FIELDWORK: In the fieldwork component of this course, students will be assigned to projects at the Environmental Working Group or a similar non-governmental organization. They will have an opportunity to learn how such institutions play a role in representing consumer interests in product safety issues being debated in both the administrative and legislative processes, and in matters subject to litigation.

Prerequisite: J.D. students must complete the required first-year program prior to enrolling in this course (part-time and interdivisional transfer students may enroll prior to completing Criminal Justice, Property, or their first-year elective).

Recommended: Administrative law, as well as food and drug law, and environmental law-related courses, are recommended but not required.

Mutually Excluded Courses: Students may not concurrently enroll in this practicum and an externship, a clinic, or another practicum.

Note: This practicum course is open to LL.M. students, space permitting. Interested LL.M. students should email the Office of the Registrar (lawreg@georgetown.edu) to request admission.

This course is suitable for evening students who can commit to attending class and working 10 hours/week (during business hours) on site at their field placements. This is a four credit course. Two credits will be awarded for the two-hour weekly seminar and two credits for approximately 10 hours of fieldwork per week, for a minimum of 11 weeks, to be scheduled with the faculty. The fieldwork must be completed during normal business hours. The two credit seminar portion of this practicum will be graded. The two credits of fieldwork are mandatory pass/fail. Students will be allowed to take another course pass/fail in the same semester as the field work. Students who enroll in this course will be automatically placed on a waitlist. To request admission, email the Office of the Registrar (lawreg@georgetown.edu).

LAW 1497 v00 Urban Law and Policy Seminar (http://curriculum.law.georgetown.edu/course-search/?keyword=LAW%201497%20v00)
J.D. Seminar | 2-3 credit hours
This seminar will explore a range of legal and policy problems currently affecting American cities including housing and land use, concentrated poverty and racial segregation, expanded efforts to police crime, recent efforts to regulate harmful products (sugary drinks, tobacco, guns, unhealthy food), innovative efforts to encourage economic development, and strategies to expand social justice, among others. We will analyze the underlying social, economic, and political causes of these problems and the responses made by policymakers and courts. We will examine the limits of existing legal doctrines concerning local government powers at a time when local government units are being asked to take on more and more responsibility for improving society and regulating the conduct of citizens in local jurisdictions. Grades will be based on active participation in class discussion and a research paper. The last few weeks of the course will be devoted to student presentations of their research. Students seeking to use this course to satisfy the upper-level writing requirement must sign up for the three credit section.

Note: This seminar requires a paper. J.D. students must register for the 3-credit section of the seminar if they wish to write a paper fulfilling the J.D. Upperclass Legal Writing Requirement. The paper requirements of the 2-credit section will not fulfill the J.D. Upperclass Legal Writing Requirement.

ATTENDANCE IS MANDATORY AT ALL CLASS SESSIONS. Enrolled students must be in attendance at the start of the first class session in order to remain enrolled. Waitlisted students must be in attendance at the start of the first class session in order to remain eligible to be admitted off the waitlist. All enrolled students must attend each class session in its entirety. Failure to attend the first class session in its entirety will result in a drop; failure to attend any subsequent class session in its entirety will result in a withdrawal. Laptops and tablets are not allowed in the classroom.
