More than ever, lawyers and policymakers need a deep understanding of technology and the legal frameworks around it. Law firms are building specialized practices to meet increased legal demands around data security, privacy, artificial intelligence, fintech, and emerging technologies. Elected officials and government agencies require well-grounded counsel to update tech law and regulations. The business and public interest worlds alike demand advocates who can address new legal, ethical and societal challenges as they arise alongside rapid advances in technology.

Why this degree?
Technology plays an ever-growing role in our economy, society and political discourse. Rapid innovations in data gathering and analysis, machine learning and digital technology are transforming our social interactions, economic markets, civic institutions – almost every part of our lives. The laws and policy frameworks related to technology are ever-changing and require lawyers and policymakers to stay up to date. Georgetown’s LL.M in Technology Law & Policy is designed to provide these skills.
