LL.M Course (cross-listed) | 2 credit hours

Recent years have witnessed explosive growth in private equity funds and hedge funds. It is estimated that over \$1 trillion is currently invested in hedge funds globally, and assets held by private equity funds may also exceed \$1 trillion. Many law firms now have specialized practice groups focused on these investment vehicles, and the M&A tax practices of law firms and Big 4 accounting firms are often driven by private equity transactions. Given their rapid growth and economic clout, it is not surprising that private equity funds and hedge funds have attracted increasing attention in the tax-writing committees of Congress.

This course is designed to help students gain an understanding of the structure, economics, and taxation of these investment vehicles. The course will begin with a general overview of private investment funds, the different types of funds, and the main economic drivers affecting the fund, its investors, and the sponsor or general partner. We will then examine the major US tax issues that arise during the life of a fund, beginning with the consequences for investors and the general partner when the fund is organized. Students will study the partnership, corporate, and international tax issues that are common to each type of investment and to fund operations generally. Finally, the course will address the tax consequences of certain exit transactions, such as the sale of a portfolio company.

The course will also include recent legislative and regulatory developments affecting private equity funds, including the taxation of so-called "carried interests" (the profits interest earned by the general partner or sponsor).

**Prerequisite:** Federal Income Taxation (formerly Taxation I) and Corporate Taxation (formerly Taxation II) or Corporate Income Tax Law I.

**LAW 809 v02 Tax Research and Writing** (<https://curriculum.law.georgetown.edu/course-search/?keyword=LAW 809 v02>)

LL.M Seminar | 2 credit hours

The “tax research” portion of the course will cover the hierarchy of authority and other information sources most relevant to tax lawyers. We will begin with an overview of the federal tax legislative and regulatory processes and their research trails. Next, we will explore the universe of subregulatory guidance, written determinations, and other information produced by the Department of the Treasury and the Internal Revenue Service. Then, we will dive into the world of judicial opinions and examine the three choices of forum available for litigating a federal tax dispute. The final “tax research” class will focus in depth on U.S. international tax research and, in particular, on tax treaties and the role thereof in the U.S. tax system. Students will complete weekly practice-oriented research assignments to develop a working familiarity with where this authority or other information can be found and the relative weight thereof.

The “writing” portion of the course will focus on developing effective legal writing skills. The ability to succinctly—and authoritatively—convey one’s thoughts in a written work product is an essential skill in the legal profession. The strength of a legal argument depends not only on the sources of authority cited but also on the manner in which those authorities are presented. Students will apply their legal research and writing skills in completing a graded analytical writing assignment (e.g., research memorandum, opinion letter), along with a short persuasive writing exercise, on a timely federal tax issue.

**LAW 846 v00 Tax Treaties** (<https://curriculum.law.georgetown.edu/course-search/?keyword=LAW 846 v00>)

LL.M Course (cross-listed) | 2 credit hours

International tax treaties determine why hedge funds are located where they are, how motion pictures are financed, whether the dispatch of employees abroad is economical, and why financial assets follow prescribed international paths. They determine why Netherlands and Luxembourg have a large positive balance of trade with the United States, and why recording studios are established in the Caribbean. They determine whether bank accounts in Switzerland and Liechtenstein are really secret. While tax treaties ostensibly are only about dividing up tax bases between countries and exchanging information between sovereigns, in reality they channel the flow of investment and development in the global economy.

This course assumes that students have some familiarity with basic tax treaty concepts and examines how provisions of the OECD Model Treaty and the United States Model Treaty are used by tax practitioners to achieve specific business objectives. Students will acquire an understanding of how treaty provisions help shape economic and financial decisions in different industries and economic sectors. The course uses examples drawn from actual practice to illustrate the creative use of tax treaty provisions. It is designed to be an interactive experience, with students working on case studies, discussing alternative approaches, and using different jurisdictions and changes in the form of the underlying transaction to achieve desirable tax results.

Learning objectives:

This course is intended to teach the concepts underlying the United States Model Tax Treaty and the OECD Model Tax Treaty. By the end of the course, students are expected to understand how tax treaties are organized and be able to apply the model tax treaties to factual situations in which the tax treaties are applicable.

At the same time, the course is intended to challenge the student to be aware of the ethical challenges and risks of practice in the area of international taxation. More and more, tax authorities are not only looking to penalize a taxpayer for improper tax planning, but also the tax advisor who recommended the course of action followed by the taxpayer. By the end of the course, students are expected to be able to understand where the borders of ethical behavior are when developing international tax structures and to be able to analyze risks to the clients and themselves when working in this area.

Finally, the course is intended to reinforce principles of close reading and attention to the specific wording used in the tax treaties and cases interpreting the tax treaties. By the end of the course, students are expected to be able to read and understand why specific words are used in tax treaties and the significance of these words.

**Prerequisite:** Federal Income Taxation.

**Note:** Enrolled students will have until the beginning of the second class session to request a drop by contacting the Office of the Registrar; a student who no longer wishes to remain enrolled after the second class session begins will not be permitted to drop the class but may request a withdrawal from an academic advisor in the Office of Academic Affairs.
